If you take into account that this casino is honestly an online gaming site where players are able to make in-app purchases rather than depositing actual money, the number of jackpot slots that you'll find available are considerably less than at an actual casino. There are a few that players will be able to get stuck into but that doesn't mean you'll have the chance to win life changing sums of money, so to speak. Rather, you'll be able to make trades for different items that will all offer different sorts of perks to amp up your experience in some way or another.

I have played this app daily for more over a year and a half. What I have come to find may be of help to you. The higher you climb level wise the less you start to win. As it became harder to win I found myself spending a couple hundred dollars. Some wins were not honored by the app, citing app glitches. One of the biggest being the puzzle portion of the game. During an event the payouts were reflected in the billions, I won 9B but was only paid 400k as an apology from the app provider. Several others were also cheated this way. Huuuge Casino told me that it was a glitch and that I needed to pay attention to the event details, not the actual payout screens because of glitches such as this. Yes I was actually told this. I had spent 50 dollars on this event and was completely ripped off by them. They never did make it right. If you play, do not pay! The app is a scam. Check it out yourself, google their fraudulent activities. Just got a response from the developer ensuring that the algorithms are fair, lol! Don't care! Because I deleted the app and am never going back.

The site is entirely focused on slots so there are no table games or other familiar casino titles available to play. With that being the case, the range of games available to new players is fairly small and we hope that more will be added.

Live dealer games have become all the craze in recent times. This can definitely be attributed to the fact that the pandemic has limited not only access to these land-based casinos but also the movements of individuals. This opened the door for online casinos to provide a place that offers players a similar experience. You'll be able to play against both the dealer and other players from around the world in real time. As you can imagine, this has completely changed the game and is the reason why more and more online casinos will offer players a live dealer section. Currently, Huuuge Casino doesn't offer live dealer games but that's not to say this won't change in the near future.

The casino itself has been designed for this exact purpose. From the moment you login and begin using the app, you'll immediately realize just how much effort has gone into making it. I'm not new to Huuuge. Level 2947 with HUUUGE title so I truly have history with enjoying the games. I guess I returned to play after a 3year break thinking that I could enjoy the games without having to spend my hard earned cash for fake chips. But what I found is that without spending personal money I will not progress with wins. I've noticed that I'm only able to play recently off of chips from Betty bonus and bonuses from other members jackpots. I only see trillions when I shop "sales". As I type this I have determined that I will never make another purchase and I am okay with knowing the days of winning jackpots or Huuuge wins are over.
