Bally's has been a familiar name in Atlantic City for decades. Bally Casino, however, has launched online in New Jersey with an updated look and feel.

Our Bally Casino review will cover everything you need to know about the welcome bonus, plus we'll take a look at the available casino games, the casino app, customer support, and banking options.

The Bally Casino welcome offer is not typical. FanDuel Casino is the only other New Jersey online casino that offers risk-free wagers once you make a deposit. However, while FanDuel will reimburse any net loss over the first 24 hours, Bally covers a full week.

To qualify, just make the first deposit of at least \$10 and place at least one wager on any casino game. If you end up losing your full deposit during your first seven days on site, Bally will refund you in cash that you can withdraw (minimum of \$10). Note that any withdrawals during the seven-day time frame will automatically exclude you from the promotion.

And don't forget, just for creating your account and using the Bally's promo code PLAYBONUS30 you'll get \$30 in bonus funds absolutely free.

Bally and Gamesys, a UK-based digital gambling operator, merged in October 2021. The deal not only included a top-of-the-line mobile platform, but also new access to a range of exclusive games from Roxor Gaming, a former subsidiary of Gamesys up until 2019.

Players can access games on either a website or the app. Nearly everything available on the full-sized version of the site is also available on the app, including most of the games, full banking options, the loyalty rewards program, customer service, and details on new, current, and past promotions.

The Bally app and website currently offer about 200 total games, including nearly 150 slots. It adds new games often, so be sure to check out the "New" tab on the navigation bar whenever you log in.

Most games are available to play on the go, although, as always, you'll have a more predictable and reliable experience when you connect via a strong and stable Wi-Fi connection. The Bally Casino NJ app is free and operates similarly on Android and iOS devices. One difference, however, is that only the iOS version of the app offers live dealer casino games at the moment.

To download the app, create an account on the Bally Casino website first. Head to the mobile version of the site, sign in and select an appropriate app download button if one is available. If not, you may need to get the Bally Casino app directly from the Apple App Store or Google Play

Store.

The great news is that we found the Gamesys platform to be fast and smooth. The game graphics loaded quickly with a good Wi-Fi connection. We played a dozen titles, including graphics-heavy games such as Finn and the Swirly Spin and Da Vinci Diamonds, and experienced minimal hiccups overall.

We did find that games ran even faster when we disabled the sound, but we encourage you to try all the settings on your device to see what works best for you.

Bally's online casino is still in the building stage, so you can expect to see new online casino games available on a frequent basis. At the time of this review, Bally had about 200 games, including nearly 150 slots, five live dealer games, and a variety of other casino games, including craps, keno, video poker, baccarat, roulette, and blackjack. Bally also carries a few variety titles, such as instant-win scratch-off games.

Along with 10-plus exclusive slots from Roxor Gaming, you'll find real money slot games from popular software developers such as IGT, NetEnt, Shuffle Master, and Roxor. On average, the overall return-to-player rate for Bally slots is 96%.

Dancing Drums Explosion is a 2021 release from Shuffle Master and SG Digital. With two free spin features, Fu Bat wilds, expanding reels, the chance to win one of four fixed jackpots, 243 paylines, and up to 32,768 ways to win in the bonus round, this game has the potential to erupt in cascades of action.

This in-house version of single-hand blackjack will accept wagers of \$1 up to \$1,000. Features include splitting pairs and doubling down on any two cards, along with insurance and surrender options. Split any two cards of matching value, including mismatched face cards, up to three times on one deal.

Note that you can split a pair of aces only once, and if you do so, you can't draw a blackjack for either hand. The overall RTP is 99.64%.

You can play most, if not all, of the games at Bally Casino for free in demo mode. To play when you're logged in to your account, hover over the game graphic and click the "More Info" link. In addition to viewing minimum and maximum wagers, along with a short description of the game, you'll see a "Demo Mode" icon. Click that button to play for free. Bally will give you a number of fake coins to play with. You won't be able to win any real money playing this way, but it's a good way to try the games.

At this point, Bally offers only a few banking options. We expect that to change down the road. In the meantime, if you have a bank account, a participating credit card, or will be passing through Atlantic City, you shouldn't have any problem adding money to your Bally online wallet.

To fund your Bally NJ Casino account, click the menu button from the main page and follow the prompts from there. Deposits require a minimum of \$10, and are available via the following methods at the moment:

Bally recommends VIP Preferred as the fastest and easiest option to add money to your account. To enroll, simply enter your driver's license number, bank account number, and routing number. Once you've gone through the process once, you will be able to use this method automatically in the future. The maximum deposit amount is \$5,000 per transaction.

Some credit card issuers do not allow online casino transactions. Here is Bally Casino's (incomplete) list of banks that are likely to allow them:

Before you can successfully make a withdrawal from your Bally Casino account, you must meet the following requirements:

Again, VIP Preferred is Bally Casino's recommended method for withdrawals. After an internal review, e-check withdrawals typically take three to five business days to arrive in your bank account.

Note that the minimum withdrawal amount at the cashier's cage is \$50. You'll also want to call 844-980-2720 to have your withdrawal preapproved. Once preapproved, you'll have 48 hours to make your withdrawal at the cashier's cage.

I submitted all of my info, pictures of my License & my social security just to be told my account is going to remain locked out. I can't even log in to delete the account so not only do they have access to all of my information they also have pictures of it. Can't believe I fell for a scam like this. Would give zero stars if I could but I'm putting five so that hopefully people will read this review before downloading it & making the same mistakes I did.

I enjoy online casinos and have played at most available in NJ. HOWEVER- this app is the only one where I have had issues. Many times over in the middle of a game it will kick you off, say that you are attempting to play outside of NJ, and you have to log back in. Also, on the mobile app, I have an issue with withdrawal and have to log into my computer to make a withdrawal. Customer service asked me to delete and reinstall the app but this did not fix the issue. Most recently, and not for the first time, I have had to chase down bonus money from customer service after receiving one of their offers. I have been on live chat 3 separate times for the same offer and only the last one even offered to escalate it to a supervisor. My advice to anyone who enjoys the games at Ballys and experiences similar issues- play at their sister site Virgin Casino. I have not had any of these issues there, and cannot recall ever speaking to their customer service representatives

I use a lot of online gambling sites and when I saw that ballys created one I decided to try it out. I cannot believe how much this casino is completely turned off. This company must be bankrupt and they are using online casinos as a way to recoup their massive losses or something because I spent 500 dollars and didn't get a single bonus or single line hit above 10 dollars lol. And I understand that gambling involves losing but I literally spent 500 dollars only getting 1.76 playing endless treasure slot machine and I didn't get a single bonus or win big enough to make it worth it. Whatever you do, do NOT use this casino. There are plenty of other online casinos that aren't trying to just steal money.
