We have read many tales of players being denied legitimate winnings by this casino and indeed, when we checked the site out ourselves, both our two testers had their accounts suspended and winnings confiscated. Our first foray into casino whoring starts with Casino On Net casino bonuses.

Casino On Net - The offer is 100% up to \$200. The greatest thing is that its only 10X WR to clear this casino bonus. You can clear this casino bonus so easily becасue you only need to wager \$2000. cashout. All in all this is one of the highest percentage casino bonuses out there. It is also my favorite to casino to play at.

Unlike land-based casinos, there are no geographic restrictions preventing you from moving your money from one online casino to the next. So in order to attract customers, the casinos make various cash and non-cash offers, known as casino bonuses. For example a casino may offer a 100% bonus on your first deposit. This means that they will double your money when you first sign up and play. Sound too good to be true? A lot of the time it is. [Read more](#)

One last thing: if you are playing with high bets, if you hit a nice jackpot you should lower the stakes. That will increase your chances to clear the bonus.

Perhaps one of the best known cases is of Russ Hamilton, who had inside information by way of hole card access at UltimateBet.net. Essentially, Hamilton was able to play with knowledge of the hole cards of other players, which would enable him to know in advance of making his bets whether or not he had the edge. There were also a few other confederates at that site that shared similar knowledge, as well as a handful of lesser-known cases at other sites. The Hamilton case was especially egregious, however, because he also had a direct stake in the site itself.

In 2006, poker pro Chris "Jesus" Ferguson began a journey that would officially make him the biggest bonus whore of all time. Starting with \$0 he built a poker bankroll of \$10,000 at the online site Full Tilt Poker.

Online poker is also good. If you have the poker skills and can play Texas Hold 'Em then online poker can be a good choice. The problem is that some areas, such as the United States, have banned online poker and there are very few poker sites offering free money.

One last thing before we start: there are two types of bonus hunting – deposit one and no deposit one. We will first cover the first option as it is the one that can generate more significant wins. For no deposit bonus hunting check the bottom of the page. (In general, freebies hunting became pretty much irrelevant in UK as casinos stopped offering significant free chips. The situation is obviously not ideal, and would be better replaced with bonus structuring such that the bonus is a seemingly better value. That can be accomplished while reducing a player's expected cash loss relative to total action and initial deposit, while still accomplishing the primary goal of extending playtime. In the meantime, there would also be some winners rather than the constant posts of, "I can never win when I take a bonus," and good word-of-mouth is a plus for any online casino.

Before the bonus can be cashed out there's a certain amount of wagering involved. I know the explanation of the the wagering requirements have been covered to the point of exhaustion but let me explain it again. Let's say a player accepts a bonus of 100% up to \$100. He deposits \$20, the casino gives him \$20 in return. Therefore, it doubled his initial bonus, he can now play with \$40. Before any winnings associated with the bonus can be cashed out he must clear the play-through requirements attached to it first. If the wagering is 30xb, he must roll over $30 \times \$20 = \600 . Certain games contribute differently towards the weighting of the wagering requirements. Slots normally contribute 100% and table games 10%, this also depends on the site.
