If you are getting bored of playing games at your favorite casino, luckily for you, there are plenty of fantastic sites like Chumba casino available.

Chumba casino may well be one of the favorite sweeps cash casinos going, but it pays to use several online casino sites in this game. Social casinos are pretty popular right now, and new ones are coming out all of the time. They offer an alternative to traditional online casinos and online casino games, a cash-free way of gambling. You can play online slots and table games without spending a cent or spin slot games to win real prizes in mini-sweepstakes contests, although you can play for real cash prizes. They can be seen as a free casino site where you can play online slots with less pressure.

Chumba casino features a decent range of games that you can play by purchasing packages such as gold coins and sweeps coins. This makes the sweeps casino a different beast compared to a real money casino, but they are currently much more widely accessible to players in the US.

Compared to a real money casino, the overall range of slot titles does seem lacking, certainly from a dedicated slot player's perspective.

While Chumba casino is one of the fastest-growing social casinos in the USA, there are plenty of sites like it if you're looking for another kind of challenge. Chumba serves as a great alternative if real money casino apps aren't yet available in your state. But are there any better sweeps operators you could be playing?

This guide will show you other websites like Chumba casino, where you can enjoy social casino gaming and win the sweepstakes. These sweeps casinos also offer some of the best online casino slots available from awesome slot developers that rival those available at real money casinos and, in some cases, are even better!

Every now and then, we all need a change of scenery. Below are some great alternative sites to Chumba Casino that offer new players a superb welcome bonus when you join. These sweepstake casino sites all use sweepstake coin currency. If you are new to online gambling in general, joining a sweepstakes site is a perfect way to ease yourself in, as you can play your favorite casino game for sweeps coins rather than real money.

Our top alternatives to Chumba are the BetRivers social casino and the Pulsz Sweeps Casino. Suggesting other sites doesn't mean Chumba Casino is rigged or anything, it is however useful knowing other sites like it.

Pulsz Casino is a sweeps casino dedicated to online slots and is 100% focused on being sweep-based. The overall design and user interface are graphically superb, and possibly the best looking sweeps casino currently on offer. But it's not just about looks, right? Pulsz has a stunning list of online slot developers to back this up, with notable developers such as Pragmatic Play (Big Bass Bonanza), Relax Gaming (Money Train 2), and even up-and-coming top developers; such as Print Studios with unusual games like the superb Royal Potato on offer!

There are several valuable filters to find all the Megaways slots and slots with a Bonus Buy feature which they have listed as "Play The Feature" our only minor criticism is their outstanding artwork has been used to replace all the slot game imagery, so initially, we struggled to visually spot all the big name online slots they actually have on offer!

BetRivers Social Casino has one of the best range of online slots available in a free-to-play format, with access to outstanding online slots from providers such as Novomatic/Greentube that aren't even available to play in any real money casinos in the US. Games such as Book of Ra Deluxe, Lucky Ladies Charm Deluxe, and many more, with notable other developers including Pragmatic Play with the must-play Dog House slot with its sticky wilds!

Superb game filters that allow you to filter by the game provider, game type, and even list the slots producing the biggest wins recently make this

casino a superb place to play at.

Other sites similar to Chumba casino or sister casinos are LuckyLand slots, Funzpoints, and b spot casinos. They all offer the chance to play casino games like the PCH slots for fun site, straight from your mobile. Fortune Coins provides a solid range of slots and great regular promotions and is well worth checking out after our top 2 picks above.

Although the design looks dated now, the LuckyLand slot site is a decent sweepstakes casino for slot games. The site provides a decent selection of online slot titles. You can earn premium Funzpoints playing on the Funzpoints platform rather than for sweepstakes coins; again has a decent slot selection. Still, the website looks very tired compared to the overall slickness of a proper real money casino.

Global Poker is also an option that provides a sweeps-based poker format, including tournaments to the same levels that you would expect playing poker for real money, all utilizing the sweeps coins while playing. They are all excellent sweepstakes sites with checking out, but the best online casino from this list will come down to what you are specifically looking for, slots, table games, regular promotions, etc.

Chumba casino is legal in nearly all US states as they are classed as a sweeps cash casino. Real money online casino gaming is only available in a select few states, including New Jersey, Michigan, Pennsylvania, and West Virginia. Using a sweepstake casino like Chumba is a great way to play the same games available at these real money casinos.

A social casino is a website or mobile app where people can play popular slots and casino games with their friends. It's different from gambling sites in the fact that you don't bet real money – you're playing for free. However, there may be sweepstake rewards involved. By playing minigames or tournaments, players can win sweeps cash coins that they can spend on cosmetic items and features in the game. Sweepstakes and sweeps casinos like Riversweeps have been around for several years but have become much more popular in recent years.

These microtransactions have made social casinos incredibly popular today. Sweeps games at High5 social casino offers slot games with real prizes and Chumba casino is no different. Players love the Chumba casino social experience and the sweeps games that go with it.

As mentioned, playing in social casinos isn't like gambling. Chumba casino sister sites offer rewards via minigames where you can win virtual rewards. Those coins can be spent on real rewards later, which makes sweeps cash casinos so popular.

Social casinos are fully legal. It's not a gambling site where you can bet real money. Instead, you play to win sweeps cash and gold coins that can be used to unlock features or buy stuff in the games themselves. Other sweeps websites offer more of the same kind of game model, but in a different setting with different slots that make things more exciting.

Sweeps or gold virtual coins can be won by playing mini sweepstakes games online with your friends. You win them by either winning rounds in the games or by completing certain challenges set by the casino. At the same time, sites such as BetRivers.net or Chumba casino also have packages of gold (sweeps) coins you can buy to get the premium virtual currency (VC). This saves you some time playing but will come with a real-money cost to buy them.

Earning a sweeps coin or gold coin is much more satisfying if you ask us. You can do this at all Chumba casino sister sites. Just log in to your account every day and have some fun with your friends. You'll earn sweeps cash coins slower that way, but it's a more rewarding accomplishment than spending real cash for the virtual coins.

Chumba casino and sites like it offer hundreds of slots, live dealer, and table games that offer such rewards. Alternatively, sites like Chumba casino may even offer tournaments where you can win bigger amounts of sweeps cash coins.

All those virtual gold coins are yours to keep. You can continue piling them up or use them on gift cards, to unlock features, or simply redeem them for cash. Keep an eye on no deposit sweeps cash bonus codes. These will help you claim a bag of virtual coins right after registration for no fee at all.

Keep an eye on the casino's social sites too, as raffles and promotions are a regular occurrence with loads of gold coins being given away daily for easy to enter competitions.

If you are a fan of playing slots and are in a state where real money gaming is allowed, DraftKings casino has some great games available for players. You can see which slot games on DraftKings we rate the best and see which are likely to pay out the most.

Yes, you can use coins received from sweepstake games online for cash prizes. Players can also redeem these coins for virtual currency or gift cards. Of course, you'll need to provide personal and financial information for it so the site knows that no one else is using your credentials.

As mentioned earlier, Chumba casino is one of the premier social casino sites on the market. However, players might want to try something entirely different. Some are simply fed up with Chumba, looking in the direction of other casinos. You may think Chumba doesn't have enough video poker titles or table game options or you just can't find your favorite online casino game. Whatever the reason is, you can easily join other sites and play some different games.

Some of the sites we can recommend that have sweeps games are BetRivers.net and the Pulsz casino. Both are pretty similar to Chumba and offer plenty of sweepstake games online. With a much broader range of online slots though it's safe to say that they are much better than Chumba and its sister sites, especially if you are a fan of online slots. They're a nice change of pace from Chumba casino while offering the same packs of gold coins you can redeem for gift cards and cash.

Chumba casino and all sites like it are entirely free to join and play. Remember – they're social casinos, which makes them different from gambling sites. Chumba casino won't offer real money prizes but has plenty of excellent games where you can win virtual rewards.

As mentioned earlier, these can be exchanged for cash or gift cards, the latter being the most popular option.

Chumba casino is completely legal, as are all other social and sweeps casinos we have mentioned in our review.

Since you're not placing real money bets, there's nothing to worry about from a legal standpoint. It's just like playing on an app such as Facebook. You won't spend real money playing on it, so the law doesn't require these sites to register as gambling venues.

You can, of course, still buy bags of coins, but microtransactions are not deemed a gambling activity. To put it simply, social casinos are perfectly legal so that you can play the games without any concerns.

The main difference between Gold Coins and Sweeps coins is that gold coins can be purchased as part of a package and used to play sweeps games at a casino.

Sweeps Coins however are generally awarded for free as a bonus, bundled with a Gold Coins package, or won from specific promotions.

These Sweeps Coins won as prizes or part of a bundle can then be redeemed as cash prizes.

You will only find legal and licensed US casinos listed on the Mobile US Casino site.

You may be surprised to learn that we don't actually think there's an objectively best game to play on Chumba Casino slots. This isn't because there's a lack of titles to enjoy – any Chumba Casino review can tell you there is. Rather, it's because we believe it comes down to personal preference.

There are dozens of top-quality slots available from this social casino. Many of them are also at a similarly top-tier level, to the point where you cannot say impartially that one is better than the other. However, that doesn't mean there isn't one which could prove to be the ideal Chumba Casino slot for you. And finding it should prove to be a lot of fun.

While we're not here to tell you the objectively best game on Chumba Casino slots, we did think we could pick a few that we especially enjoy getting you started in your exploration. So, what are some of the best candidates for our Chumba Casino slots cheats? Which would be best suited to utilizing a Chumba Casino sign-up bonus? In no particular order, here are five of our favorites.

Get ready to draw with the 4×5 Megaways game which offers rewards up to a rootin' tootin' 10,000x. And it's far from all or nothing, with 42 jackpot and prize opportunities, and 42 scatters as part of bonus response bank heist.

From the Wild West to the reaches of outer space. The magic of the stars awaits you in Hypernova, with 10,000 ways to win throughout their 6×4 base. There's even a jackpot respin feature capable of multiplying your coins by thousands. Perfect for fans of great slots and the cosmos.

Fancy another 10,000 payways? Perhaps in an Egyptian setting? Chumba Casino's got you covered. Enjoy not only The Last Empress' stunning graphics but their free spin feature, hold feature, and a mixture of mini, minor, progressive major and grand jackpots for loads of ways to earn prizes.

There's certainly no shortage of fascinating themes at Chumba Casino, as this time, we take to the high seas with Kraken's Bounty, and what a bounty it is. Featuring two progressive jackpots and a compass feature where you can unlock free spins or try your luck at the wheel bonus. Tons of fun over 50 lines on a 3×5 reel.

To help showcase the range of Chumba Casino, we've gone for Quest West as our final pick. A truly out-there ancient Egyptian slot, it features

monkey, prince, warrior, and piggy icons, alongside an open lotus flower scatter symbol – key to the bonus round. It's fun, creative, and has great game fundamentals across its 3×5 reels and 50 lines.

Chumba Casino doesn't just offer one of the finest social casinos on the net; they also have their own app known as Chumba Lite. The question for our guide to the greatest slots from Chumba Casino then is whether or not the top slots are different for the mobile option. Well, wonder no more, as we've got that covered and plenty more.

Did you know there are plenty of ways for players of online casino games to enjoy their gaming with free money? And as a bonus, some revolve around legit ways to play a game and place bets to win real cash prizes. Known as casual or social gaming casinos, these social gaming sites are similar but different from those you'll have an opportunity to play in real money online casinos.

The list of competing social casinos offering games for fun includes broadly similar sweeps cash casinos like Luckyland, Pulsz Casino, and Funzpoints Casino. But the best known of all of them and often cited by players of social casino games as the number one social casino is Chumba Casino.

Throughout this Chumba Casino review, we'll see that it takes the form of a remarkable social gaming platform with an added twist. Chumba gives players in the USA and Canada free casino games via the ChumbaCasino.com or Playchumba.com social gaming website or a mobile casino app called Chumba Lite – Fun Casino Slots. You don't even need to download this app since the website is fully responsive.

It also offers a chance to bet to win cash prizes via its sweepstakes gaming model based on Sweeps Coins and Gold Coins transactions. The nature of this sweepstakes business model means that players are not really gamblers but gamers using social currency to play.

Chumba Casino caters to the inherent fascination that players have with online games. Especially those where someone can win money and indeed those types of game you can play for free. Because of this, the general opinion is that Chumba has become one of the better-known examples of this kind of social gaming website.

Chumba Casino has cleverly found a place in social media with a range of game options that encourages the inner gamer in all of us. Although not a real online casino, the usual casino games like jacks or better video poker, themed video slots with progressive jackpots, roulette, blackjack, many other online casino table games and even a version of bingo are all on the list of options you'll find in the free and sweeps games lobby. In particular, the slot machine library is pretty well-stocked.

We'll see in our scrutiny of Chumba Casino that – while the mechanics of playing to win a bet is the same – the truth is there is no real money wagering involved and no hard cash betting. But there are options to purchase and receive virtual Gold Coin packages, along with ways of getting daily login bonus and other bonus awards that will build up your playing balance and additional Sweeps Coins for entering the sweepstakes with cash prizes. If your luck is in, you have decent chances to win money at Chumba by playing against the casino or in tournaments against opponents.

The main allure of Chumba Casino is its combination of free-to-play gaming and the Gold Coin/Sweeps Coins method of entering sweepstakes to win real cash.

There's a chance to redeem US dollars through the proprietary, patented real money sweepstake model with claims of well over a million registered players throughout the United States (except Washington and Idaho) and Canada (except Quebec). This patent status prevents competing operators from running a similar model using Sweeps-style virtual currencies.

Our assessment will demonstrate that alongside players' options to play on a desktop PC, laptop, or mobile phone using the Chumba app, the platform delivers a broad range of online gambling games either for free or by using the sweepstakes gaming options.

You can register an account and login easily and use the virtual currency of free Sweeps Coins or Gold Coins at Chumba Casino alone or in tournament-style contests.

Chumba will even give first-time US players a Chumba Casino no deposit bonus. That means extra virtual coins for your first spins on casino slots games or card game deals, and you can get them on the Facebook page, mobile app, or website. There are regular giveaway promotions, too. Just don't forget the taxes if you win a substantial amount of cash.

We're well-positioned to put together a helpful player's guide to Chumba so that we'll all become Chumba experts. Our analysis will explore it deeply enough to assess whether it's a valuable option for any player who wants to play casino games for free but with opportunities for real money play. When we've tested it thoroughly and fully assessed the critical performance indicators, our exploration will have confirmed or denied its promise, and we'll jointly know the answer.

Before we begin, you'll likely have some burning questions that will help set the scene further if we can get you some good answers. You'll find many other FAQs around Chumba after the review conclusion, but let's take a look at a few of the crucial questions and answers first:

With a history going back a good number of years now (we first reviewed the platform way back in 2014), and licensed by Malta Gaming Authority, the brand that's owned by the recognized company VGW Holdings has become a legal, safe and trusted way of playing either for nothing or without risking (too much) of your own real money.

As far as anyone is concerned, sweepstakes law ensures it offers a legitimate way to play for Canadian and US residents barring those in Washington State, Idaho, and Quebec.

All in all, there's no hard evidence of a scam from any complaint we've seen. There are some complaints of not getting paid (though many of these seem to be down to ID issues) and low or infrequent wins (though we have to recognize that this is casino gaming, there will be volatility sometimes).

There are plenty of reports of players winning and getting paid reasonable sums. This Reddit thread gives a balanced number of views on the platform's legitimacy, with a poster winning and getting paid an excellent \$1000.

Gambling is a far-reaching term that can be applied to any form of contest where you're wagering money to make more of it. Based on this definition, you'd have to say that the entertainment at Chumba isn't gambling. The games are gambling type, though, and there is a risk you could be enticed into playing at a real money online casino.

Alongside the Gold Coin games, the service uses a unique sweepstakes model, which lets users cash in Sweeps Coins for prizes. This offer of free cash under a 'no purchase necessary' clause places the gaming into a non-gambling category which positions Chumba outside US gambling laws. Sweepstakes are legal in 50 U.S. states.

So for fans in the US and Canada – where Chumba is targeted – it meets the legal and regulatory conditions across most US states and Canadian provinces or territories to offer cash gaming, except Washington, Idaho, and Quebec. Chumba states they "engage with leading experts in those jurisdictions to ensure that we are fully compliant with all applicable laws". This means that Chumba is legal in the U.S. and Canada except for the above locations.

If you have any concerns, remember that Chumba is just one of many social gaming casinos you can find on Facebook or the internet. You'd have to expect that FB would have shut them down long ago if there were any legal concerns. Given the time the company has been operating, you can be sure that you won't be breaking any laws.

Yes, registering an account at Chumba Casino and playing games is free. Signing up costs nothing, and you're given a welcome no deposit bonus

that includes Gold and Sweeps Coins. Having coins means you can play the games for nothing and potentially win more coins.

If you subsequently want to play more often or for more chances of winning cash prizes and becoming one of the casino winners, you'll probably need to buy some extra coins.

Playing at Chumba can involve a mixture of real money and virtual coins. You play the games with virtual coins that you may have received for free or might have purchased with real money. You win virtual coins, which can be cashed in and exchanged for real money provided you have reached the minimum cashout level, and they are Sweeps rather than Gold Coins.

Now we've answered some pressing questions as a prelude to the main body of the investigation; this seems a sensible point to search deeper and conduct an intensive review of the PlayChumba/ChumbaCasino website, mobile app, and precisely what Chumba Casino has to offer overall.

If you're a player who prefers their winnings in cold hard cash, I suggest you track down a game that pays out lots of wins, like 3-card poker. But for now, let's proceed with an in-depth assessment of exactly how Chumba Casino's sweepstake-style gaming works. We'll start in a minute by seeing how to use Chumba, but firstly let's see an alternative...

Keen on playing social poker? Want to be involved where you can win the free sweepstake-style prizes with a coin purchase similar to those at Chumba Casino?

Reviewing any service or product is worth knowing the alternatives and where you could get a better or worse experience. Chumba is not alone in providing this type of social casino product.

Several alternative free gambling game operators like Celebrity World Casino and Global Poker give a similar experience and an equal number of opportunities to pick up some winnings. Indeed, Chumba's sister site Global Poker may be one of the best options for players. Indeed, poker is one of the leading types of real money skill games, and practising for no cost on their website can build up your skill level. Visit GlobalPoker.com to find out how it works.

Let's see how a recreational player might use Chumba and get the most out of the platform. To do that, we need to understand the elements that make up the product and how they operate:

You can enjoy gaming on the website version of Chumbacasino.com, also known as Playchumba, on the mobile app you can get from the Apple Store or the Google Play Store, or via the Facebook page.

Chumba Casino sells a virtual currency known as Gold Coins. You can play free Sweeps Coins games by purchasing a Gold Coin package, but you can't trade them, transfer them, or redeem them for money. Essentially you can either buy them, win them, or obtain more by accepting bonus offers or promotions.
