Club Player, an online casino based on a gaming club theme, belongs to the Gambling Wages Group, one of the two subsets of Virtual Group. The online casino doesn't reveal much information about its ownership and licensing on its website, but it does link to the Central Disputes System (CDS), an independent arbitrator that impartially settles players' unresolved disputes with RTG online casinos.

The online casino operates on the RTG software platform. It has been licensed to offer online casino gaming services from the Government of Costa Rica. Club Player is one of the online casinos that have partnered with Players Rewards Card (PRC), a program that gives players a simple way to make deposits at 20 online casinos that accept players from Australia and the US.

Slot machines are by far the most popular online casino games. That's why most of the games you can find here are free slots to play for fun. However, we also support other kinds of casino games, including:

We are always working on expanding our library of free casino games. Right now, it's mostly dominated by slot machines, but we plan to add more games like bingo, baccarat, craps or scratch cards.

If you want to display only a specific type of casino games, use the "Game Type" filter and choose the game category you want to play. All of the filters should help you find the game you are looking for as quickly as possible.

As I already mentioned, we do our best to expand the list of online casino games you can play for fun on our site. However, with games from some game providers it's easier than with others. That's why you can't find all of the popular video slots here, but we did well to cover the most well-known games and game providers.

Here's a list of game providers whose games you can find on the Casino.guru website:

Of course, the list doesn't stop there. You can also play slots and games made by other companies. Use the "Game Provider" filter to display online casino games made by selected game providers.

Despite the declining usage of this technology, Flash is still needed to play many of the games you can try out on our website. That being said, more and more games are being created or reworked using HTML5. These casino games generally run more smoothly, don't take up as much resources and most importantly can be played using mobile devices.

Note: Flash is a bit outdated multimedia software platform which was (and still is) used to produce animations, games, web applications and much more. That makes it great for creating online casino games, but it has many disadvantages, which is why it's being replaced by newer technologies like HTML5.

If you are accessing the Casino.guru website using a mobile device or a computer without Flash Player installed, the "Mobile Devices Supported" filter will be extremely useful to you. Use it to display only the casino games you can play without Flash.

If you weren't able to start some of the games, it might be because of the restrictions based on your location. Some of the free slots and other types of casino games are only available to players from certain countries. If you are from one of the restricted countries, you are simply out of luck. If that happens, you can still choose from a wide selection of other games which you will be able to play for free.

Note: Your inability to play a game for fun can also be caused by the fact that you don't have the Flash Player installed for a game which requires it.

If you like some of the games and want to play for real money, you should find a casino which meets all of your requirements and also enables you to play the games you like. After selecting a game, you will see some casinos you can play it in for real money under the game window.

However, don't choose a casino too quickly. Some casinos are much better than others, which is exactly why we spend a lot of times creating and fine-tuning our casino reviews to provide you with all the relevant information you need. You want to find a reputable casino that will actually pay out your winnings if you manage to make a profit, right? Our reviews will help you find a safe, reputable and secure casino you can rely on.

Playing slots and casino games in our free game section is very simple. You don't need to download or install anything. Simply browse the list of games or use the search function to select the game you want to play, tap it, and the game will load for you, ready to be played. Then, simply press spin if you are playing slots, place a bet and start the game round in table games.

No, it is not. Free casino games are basically the same games that you can play in real-money online casinos, but without real money involved. When you load any of the game, you are given a certain amount of virtual currency, which doesn't have any real value. You can then play and increase your balance; however, you can never cash out the credits you accumulate in the game.

If you want to play for free with a chance to win real money, we suggest checking out our list of no deposit bonuses, which contains free cash and free spin bonus offers, which can be obtained by creating a new casino account and can be turned into a real-money cashout.

Our database of free casino games contains slot machines, roulette, blackjack, baccarat, craps, bingo, keno, online scratch cards, video poker and other types of games. The vast majority of games are slots, which makes sense, as slots are by far the most popular type of online casino games. Free roulette is also quite popular.

Our database contains pretty much all popular casino game providers. You can play games from the most popular game providers, such as NetEnt, Playtech, Microgaming, Big Time Gaming, Novomatic, and so on, but also titles from less-known local providers like Kajot, EGT, or Amatic. Basically, if games from a certain game provider can be played for free, we almost certainly have them in our database. You can apply filters or use the search function to find what you are looking for.

The vast majority of free casino games and slots behave exactly the same as their real-money counterparts at real money slots sites. They have the same symbols on the reels, the same payout table, and work identically. This is very important for players, because free games can be used to try out games before playing them for real money, and if they worked differently, it would be misleading.

There are some exceptions, though. Some game providers allow casinos to choose from multiple versions of the same game, each with a different RTP. This means that the game you play for real money can theoretically have a lower RTP than the free version. This doesn't apply to all game providers, but it's definitely worth pointing out. We suggest checking the RTP in your selected online casino just to make sure.
