Nyilvánvalóan a különbség abban a tekintetben van, hogy adott készülék milyen gyakran, milyen mértékben hibásodik meg. El kell fogadnunk azt a tény, hogy időnként javítani kell, vagy költenünk kell a karbantartásra. Ma még elég idegen gondolat a karbantartásnak az a módja, hogy egy gázkészülék valamely alkatrészét megelőző szándékkal akkor is kicseréljük, ha az még működik. Amennyiben az az elvárásunk, hogy a készülék ne álljon meg hibásan, bizony komoly pénzeket kellene rakolteni karbantartáskor. Az igazság azonban az, hogy általában a javítás akkor történik meg, ha a készülék már leáll. Ilyenkor fordulhat hozzánk a forgalmazott készülékek alkatrészeiért. Kérjük olvassa el általános szerződési feltételeinket, különösen az alkatrészekről szóló részt. Amennyiben nem biztos benne, hogy pontosan melyik alkatrésze van szüksége, nyugodtan forduljon ügyfelszolgálatunkhoz. You must select at least 1 quantity for this product.
