Book Descriptions:

Direct Vent Fireplace Installation Manual

Gas and wood burning fireplaces have a rating plate in the control compartment area, under the smoke shield or on the firebox side column. Gas and wood burning inserts have a rating plate in the control compartment area, under the ash lip or on the firebox side. The rating plate for an electric fireplace is located on the firebox ceiling. Your local authorized dealer is trained on all Heatilator products and best understands the specific building codes in your area to properly install and service your product. Additionally, all service parts including warrantyrelated needs must be ordered through an authorized dealer. Heatilator does not sell or ship service parts directly to consumers. If you do not know your dealer, please use our dealer locator. Complete the form below and your local dealer will be in touch. Please upgrade your browser for a better experience. Use these materials to find everything from complete installation specifications to guidelines on how to safely use our products. These professionals have both the knowledge and experience to help you select the correct size fireplace for your home and provide expert installation and service. The rating plate is found in different places, depending on the unit Complete the form below and your local dealer will be in touch. Please upgrade your browser for a better experience. Moreover, we are the area's premier company for fullservice installation of directvent gas fireplaces. We have a variety of styles ranging from classic NewEnglandstyle to contemporary. Our Showroom is not cluttered with unnecessary accessories. You will not find any gas grills, fireplace screens, fireplace tools, kayaks or swing sets here. Instead, you will find over 40 fully functioning fireplace displays, every one featuring its own marble and mantel surround. We encourage all homeowners, builders, architects and designers to come into our showroom and walk around, ask questions, and gain valuable information about the gasfireplace experience. We have teamed up with what feel are the best fireplace manufacturers in the industry. These wood burning fireplaces are basically metal boxes with a refractory cement brick on the inside which is designed to mimic the inside of real fireplace. Instead of a clay flue liner running through a brick chimney, there is a metal chimney that is designed to run vertically through the wooden chase. This is both safe and a less expensive way to add a wood burning fireplace to your home. A good portion of our work entails working directly for homeowners who wish to add an efficient means of heating to their home. Both wood inserts and directvent gas inserts are great options to help reduce homeheating costs. And they look great as well. Vented gas logs will give the illusion of real wood burning in your fireplace, without the hassle

of cleaning up the mess. Gas logs will not wear away over time, and will burn the same way time and time again. We offer two lines of top end electric fireplaces. We offer a wide selection of colors, finishes and types. Many of which are on display for you to see and in stock for you to pick out the exact prices you want. But how will they impact your home's energy usage. They add a great deal of warmth to your home and a feeling of ambiance that can't be mimicked without a fireplace. <http://ganteltechnology.com/system/userfiles/california-highway-patrol-traffic-collision-manual.xml>

The cleanest wood burning products on the planet. View all Wood Burning Products Where to Buy A heritage of craftsmanship. Located in Morrisville, Vermont, we know about keeping your home warm and comfortable in all seasons. For years, our dedicated Vermont craftsman have been committed to building quality stoves, handcrafting each HearthStone to meet the highest standards using the finest materials and the most advanced heating technology. As proof, every HearthStone soapstone stove is signed by the stove builder. There is nothing quite like sitting by a wood fire. Every HearthStone wood burning product is a beautiful piece of furniture that will complement the charm of your home and provide a cozy, comfortable place to relax with family and friends. Sustainable green energy. HearthStone is committed to providing heating solutions that are sustainable, renewable, carbonneutral, and clean. Heating with wood is carbonneutral. A tree decomposing in the forest emits the same amount of carbon dioxide as burning that same tree in an efficient HearthStone wood stove. By choosing sustainable heating solutions, we choose to protect our environment for future generations. Learn more about heating with wood. Clean Heating Solutions Popular Models Choose from our full range of wood and gas burning products.
