Most people dont want to think about those things until its too late. Ted Wright, who came of age in London during the Blitz of World War II, has extensive experience dealing with natural and man made disasters. He knows most problems occur after the disaster, not during it, and tells how to plan beforehand to enhance the chances of surviving the aftermath. This book covers a variety of possible disasters and considers almost any place one might happen to be when it strikes. In all cases, advance planning combined with relatively inexpensive preparations will greatly enhance your chances of survival, whether you are caught at home including mobile homes and condos, at work, at school, or on the road. It even has a special distaster plan that elementary, juniour high, or high schools should not be without. With dozens of drawings and ideas, including food torpedoes, quakeresistant shelters, medicine chests, and waterstorage trenches, this survival manual will be a lifesaver for anyone caught in a major disaster. Then you can start reading Kindle books on your smartphone, tablet, or computer no Kindle device required. Register a free business account His theme the quality of survival depends on the quality of preparation. His book contains practical information on selecting and storing supplies, and he offers advice on preparation and organization for schools, apartment dwellers, and the like. Wright briefly touches on other natural disasters, such as hurricanes and floods. The author writes in a chatty, homespun style that makes one wish for less verbiage and more practical ideas. Purchase where interest warrants. W.T. Johnston, formerly with Coastal Plain Regional Lib., Tifton, Ga. Copyright 1993 Reed Business Information, Inc.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead,

our system considers things like how recent a review is and if the reviewer bought the item on Amazon. <http://dgjst.com/upfile/canadian-society-of-allergy-and-clinical-immunology-immunotherapy-manual.xml>

It also analyzes reviews to verify trustworthiness. Please try again later. Canedo 5.0 out of 5 stars In general is a book fun to read and informative. Recommended. They should also make you think and develop new ideas for a survival plan. If you're relying on only 1 or 2 books to cover everything, you're already in trouble as disasters never follow a set script. The Author of this particular book lived through the London Blitz and learned a few things that many authors of other known survival books can only imagine as possibilities. Don't get me wrong, I've gotten lots of good information from other books on the same subject, but this one led me to think of lots of things that the others did not. A wide variety of books on the subject is the best approach. If you are serious on the subject, then this one should be read. It covers Sheltering In Place very well, as well as being a fairly entertaining read. I don't know what some of the other reviewers were reading, but it wasn't this work. I didn't see anything about weird medical advice. I did find it chock full of very useful, pertinent information. Having lived through the Northridge quake, I know what this man says is true. The simple to follow procedures make so much sense and are very practical. The author recommends a minimum of five days supply of food and water per person, kept in your automobile and stored outside your house, buried or stored in an earthquake stable shed. He advises schools to have the same for all their staff and students. Earthquake survivors must be prepared to survive without professional help, to rescue and care for the injured around them, to camp and live in their backyards or the school grounds until conditions change, and in that outdoor environment to provide for the critical needs of health and sanitation. The book is a warning of what can occur and of what preparations and actions must be done in order to survive the aftermath of an earthquake.

It does not address the need for self-protection against violence or what to do when the food and water run out. The author grew up in WWII Britain and experienced the devastation of the German bombings. His approach to earthquake survival sees the earthquake like a surprise bombing raid, coming without warning and with devastating effect. The danger of flying glass, falling objects, collapsing roofs and walls is ever present. It is the fundamental fact around which life must be structured. Large windows, overhead lighting and high stocked shelves represent danger, not convenience or comfort, and one should be wary of them. The need for durable clothing and shoes, the need to break out from a damaged vehicle or to crawl out from under debris, the need for water and food and first aid and essential medication is absolute and unconditional. Without the ready to hand preparation for these needs one cannot survive. Because an earthquake comes without warning, these needs are constant and must inform one's very lifestyle. Readers not in danger of earthquakes may find the book mostly irrelevant. The author occasionally attempts vaguely to refer his advice to other natural disasters, but his overriding concern is, without question, earthquake survival. I have one in the car along with a cheap crowbar under the seat. I am making a kit for work and even gave them away as Christmas presents. It is my intention to stock a few critical supplies in a safe place in my yard in case the house collapses and my supplies are not safely reachable. This I do because of this book. I believe this book should be evaluated by every family, and some of the ideas about schools should be addressed by teachers, PTA members and legislators throughout the country. Great food for thought. Great food for action. Thank you Mr. Wright. His Civil Defence experiences were honed in the heat of World War Two during the Blitz on London.

I was someone who prepared for war in the UK, at the same level for my community in the 80s. There was a LOT of his wise experienced wisdom being taught to me as a 19 year old THEN, as a similar volunteer although I was responsible for 2,200 people at the time. He sent me a copy of this title, but alas it disappeared when I moved home. For quake preparedness, he comes along with

some good ideas for the budget minded people. I would say your money IS wisely spent! Our payment security system encrypts your information during transmission. Register a free business account I guess its mother natures way of telling us enough is enough. We, humans, have been destroying this world since we invented the wheel, and now mother nature is stepping it up a gear. Theres nothing scientific about this mind you, its just my personl philisophy. There is also the threat of us destroying ourselves.

There are some dangerous people with dangerous weapons in this world, capable of taking out whole major cities in one hit. Needelss to say, if some crazy dictator decides to push the button and send a nuke onto your hometown nothing in this book will save you, but if it happens the next town over then the information found in the Disaster Survival Handbook could easily mean the difference between a healthy life or an agonising death. During my time in the military we were taught emergency procedures against both manmade and natural disasters, especially if being deployed in a disaster prone area. I did more relief work than actually being part of the disaster as it happened, but the training was still very valuable. I have also been pretty lucky during my travels. Ive seen the odd hurricane, small earthquake, flood and a few bushfires but never anything destructive enough to cause me major concern, i.e., Ive never had to evacuate touch wood I never will. Although I never really thought myself to be in any considerable danger during any of these times, others around me certainly did. This book puts all that training and research onto paper in an easy to use manual. More than once Ive heard on the radio that a big storm front is approaching or a bush fire is getting bigger. I just open my electronic copy of the Disaster Survival Handbook on my phone to refresh my memory and if needed I start to prepare for the worst. This way, the worst wont be for me, because Ill be prepared. For me, that is what disaster preparedness is all about. The more prepared you are the less disaster will affect you. The Disaster Survival Handbook is a nonsensense reference book on what to do to give yourself and those around you the best chance of initial survival in the case of various natural and nonnatural disasters. I truly hope you find the information useful and never have to use it for real. Sam Fury. This has lead to years of training and careerrelated experience in related subjects.

He has studied Martial Arts with the masters in China and the Philippines. Sam has also trained with experts in survival, wilderness medicine, climbing, parkour, alternative healing, and more. Now he shares his knowledge with the world through his books. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. It even has a special disaster plan that elementary, junior high, or high schools should not be without. With dozens of drawings and ideas, including food, torpedoes, quaker-resistant shelters, medicine chests, and water storage trenches, this survival manual will be a lifesaver for anyone caught in a major disaster. To see what your friends thought of this book, This book is not yet featured on Listopia. The tone is very casual, almost conversational, and filled with asides and parentheses and exclamation points. It seemed disorganized and chaotic to me. I did appreciate the point of view of the author, who lived through the Blitz in London during WWII.

His home was destroyed by a bomb and he camped out in his backyard for months. His strong advocacy of keeping disaster supplies outside the house in the yard, in a root cellar, or in a shed is clearly influenced by his background. The tone is very casual, almost conversational, and filled with asides and parentheses and exclamation points. It seemed disorganized and chaotic to me. I did appreciate the point of view of the author, who lived through the Blitz in London during WWII. His home was destroyed by a bomb and he camped out in his backyard for months. His strong advocacy of keeping disaster supplies outside the house in the yard, in a root cellar, or in a shed is clearly influenced by his background. The other thing I liked was his insistence on facing scenarios and thinking them through step by step. If a disaster like a massive earthquake were to occur tomorrow, where will I be. What will I do What will I need What will happen next. Really facing these possibilities which no one likes thinking about can help you prepare. There are no discussion topics on this book yet. This is a nonnonsense reference book on how to stay alive in manmade and natural disasters. Prepare yourself with the skills you need, because you never know when tragedy hits. If disaster strikes, the world changes. Everything weve come to rely on is in doubt, and we often find ourselves with only our wits to get us through. Chances are there will be anarchy in the streets, public services will be restricted if they do not exist, and former safe havens can suddenly become death traps. This book helps everyone learn and understand what is going on in a crisis and to take the right steps to ensure their own personal safety and that of those responsible for it. By listening to this audiobook, you will learn What everybody needs to know about disasters What are the basic disaster preparedness skills How to pack a bug out bag What you need in a first aid kit How to learn what to do about earthquake, storm, flood, landslide And so much more. With the wisdom found herein, you and your family will be able to venture out confidently, knowing that you have the best weapon to protect yourself your own imagination. Whether youre facing an earthquake, a storm, or a terrorist attack, were going through the various steps you need to take in a variety of situations to ensure that you have the best chance of surviving a catastrophe. I also really enjoy the fake journal entries at the beginning of each chapter.

They really help a person realize what kind of problems people have to face after an emp occurs. The author also mentions other informative books as well. I didn't learn anything new but I gave it to my assistant at work who has not yet started and didn't know where to begin. Wide discussion of topics. Somewhat biased in places but tries to minimize that. I couldnt stop reading it once I started it. I like how the author puts in real life scenarios at the beginning. Helps a lot when deciding on products. Highly recommend. However, it would not be good book to get as a beginner. All in all, a good book to be purchased later in your listening cycle on the subject. This is another book that I honestly hope I will never have to depend on, but if I do this is a great source of knowledge. How many of us would actually know how to survive on our own if we had to. I want to listen and have access to printed copies of as much information as possible to provide for and protect my family if the need should arise. The author also mentions other informative books as well. Great buy and very well priced. Ive been a six month for years. The author, in clear want to read language reinforced

much of my knowledge and gave me many more tips on easier methods to address a longer occurring disaster period. God forbid, it could be the best reference books you'll own. I didn't learn anything new but I gave it to my assistant at work who has not yet started prepping and didn't know where to begin. I couldn't stop listening it once I started it. I like how the author puts in real life scenarios at the beginning of each chapter. It really gives you a feeling of actually living in an disaster ridden reality. I would recommend this to anybody who wants to be prepared for an upcoming disaster. Helps a lot when deciding on products. Highly recommend. However, it would not be good book to get as a beginner. All in all, a good book to be purchased later in your listening cycle on the subject.

It is spoken in a very readable style with small snippets of fiction describing the world after the collapse. I would really recommend this book first to get all the basic you need for survival before you buy books dealing with specific problems. I have already recommended it to several of my friends. I am also considering purchasing more books by this author. Gave me some great insight to be prepared for disaster. Bought it after listening book from library. Many new suggestions for finding info. A Disaster Survival Guide for Many people were rather disturbed and I started to I'm not a worstworst I believe you shouldn't live your And the threat of a rogue There are extreme people called It includes an action However, I do ask that you recognize the And please Keeping a cool head However, its The last category three hurricane When it hit us, seven hundred Experts predict that They believe the next time a cat Human error and Because of all You'll need to That's Level I Level III is the plan and In this short Police and fire When they're suddenly taken away, few of In these circumstances, panic can set in You will NOT be able to In the event of a disaster Here are your You can go without food for a month or First priority then Enough means For a typical family of For the 3 day supply, Some people add a However, you may not The barrel is placed in the Occasional treatment with a If the lid locks If you have small children Don't let it run down Even if you don't You may not. Use 13 gallon kitchen trash can Preparing for However, it plays a Everyones stress level Canned foods will store You'll be very surprised when you shop Remember, if air can get in, so can Camping foods are another option.
