Take control of the Wehrmacht and its allies in Operation Barbarossa, from the dramatic early victories all the way to ignominious defeat at the gates of Moscow. Moreover, you will find separate Soviet scenarios, about the two winter offensives which brought the Nazis to a halt. Campaign extends into whatif territory, pitting the Wehrmacht against extreme odds. The tension of decision making and difficulties of conducting operations on a massive scale can emerge. Take command in this mobile, backandforth sort of war where logistics and poor weather are often the decider, and defeat and victory are sometimes just a mile, or a day, apart. The DLC pro is the first diode laser controller based on a digital foundation, which is essential to obtain the best performance on all key parameters Low current noise for narrow laser linewidths, excellent temperature control for stable operation and precise piezo control for frequency tuning. The digital foundation also enables full remote control, including a GUI for Windows computer and a command interface. This interface is open to all programming languages; a Python SDK is provided. Many applications require to reference the frequency of the laser. TOPTICA provides solutions for all needs The convenient software solution DLC pro Lock is directly integrated into the DLC pro while high performance locking is provided by the FALC pro. The DLC pro is the benchmark for diode laser controllers hardware for best performance, operated at unprecedented convenience. See Downloads section below for the latest software release, for download instructions and for an overview of the added features. The package is provided through Python Package Index PyPI.

Simply connect to any laser in a lab and start with its current settings. Supports DHCP and manual IP configuration. Trying new settings e.g. for locking parameters is greatly simplified. The achievable bandwidth is listed in the Specifications of the current control modules CC500 and

CC5000 below. This is of particular interest for CTL and DFB pro systems, which can be scanned across the full wavelength coverage of the laser diode. You may start this trial at any time.

For specifications see the FALC pro product page DLC ext The DLC ext allows extending the DLC pro with TOPTICA's well-established fast locking modules. These modules provide high performance laser locking if a faster feedback than available with the DLC pro Lock option is needed. Due to the long coherence length periodic modulation appears. The linewidth is obtained from the modulation depth. To update your system please follow the update instructions. This table summarizes the improvements TOPTICA introduced with the previous updates. The latest update includes all improvements. The documentation of the command interface is provided by the DLC pro Command Reference, which is included in any DLC pro software package in the documentation folder. How to use the Python SDK is explained in the project homepage of the package LabView example VIs for connecting to DLC pro no technical support, also included in any DLC pro update shows how a connection to a DLC pro is established in LabVIEW.
