WARRANTY WARRANTY WARRANTY These Paintball Markers have long surpassed their warranty period and as time goes on parts will be harder to find. A lot of manufactures have a small quantity of parts left but the price to maintain them is at a premium. Excellence is in their DNA, they strove at every turn during our 23year history to inject DYES products with a style and functionality that makes their products game changers; they want them to be both workhorses and works of art. Our kits do not include any Square rings, X rings, Quad rings or UCup seals unless specifically stated. The insert includes a list on the reverse side explaining placement within the marker. Why buy orings at all. At the beginning, your orings have a nice tight seal and all of the air pressure is directed to the paintball as it should be, causing your paintball to be straight, fast and precise. Though overtime the seal is not as good and air can leak out around the now imperfect seal and that causes your paintball not to fly as far, as straight, or as accurate as it did when these seals where new. You might not even notice the difference because you have seen it change slowly over time so you have adjusted to how it is working each time you use it, but in reality you might have lost 1030 feet per second of speed and 1030 feet of ball travel. Losing any part of your shot is no good at all. This is especially important if you are in any kind of competition with your marker.
