Since these are capable of storing a huge number of MP3 tracks and loops, the DMP555 allows DJs to enhance their sets and mixes with

the latest music from around the world. This groundbreaking innovation is possible because MP3 loops can be BPM synced to the CD output and then fired on cue. In addition, the Master Tempo control can be used to slow down or speed up SD audio, without the pitch being affected. And because the application simulates a setup using two Pioneer CD players and a mixer, its easy to master the playback, mixing and editing functions in no time at all. Its even possible to control the software from the DMP555 itself, making DJ Booth the most innovative and userfriendly application available to todays digital DJs. DMP555 supports SD Audio format of SD Card.

Compatible with CDDA, CDR, CDRW and SD Card MP3 compression. Mix MP3 loops and samples from the SD Card with CDDA audio. One Track Loop Set, Continuous loop of audio track on SD Card or CD. Input all track information and encode with a constant or variable bit rate. Products and names mentioned are the property of their respective owners.
