Page 28 PROGRAMMING The most important facets of proper care and prevent corrosion. Page 63 CABINET DETAIL PARTS Page 83 HARNESSSES PARTS Page 88 PARTS. It includes how to set all the selections to the same price, all selections on one shelf, or each selection individually. Wed love to hear from you. I can feel a little bit of coolness and I dont see anything freezing up. But it has been getting a bit warmer every visit. It is a long way off, do you think it is best just to order a new compressor unit and temperature sensor or is it unusual for these things to fail after maybe 5 years I didnt see anything in the manual about how to remove the compressor. I can never catch it in the act. Is this a problem with the bottle release or is this related to people trying to get a free coke. Or is it something else Coke pays for the parts but I have to put them in. Sounds to me it isnt shimed right, They could be shaking the vendor. <http://seramikcenter.com/kullaniciidosyalari/canon-speedlite-580-manual-download.xml>

- **dn5000 vending machine manual, dn5000 vending machine manual, dn5000 vending machine manual download, dn5000 vending machine manual pdf, dn5000 vending machine manual free, dn5000 vending machine manual instructions.**

If you are not keeping the glides clean and product is hanging up in the gate it encourages the customer to shake machine. Make sure you are cleaning the glides and the spray them with teflon spray. If you cant see evaporator try unplugging cooling deck from inside vendor for 4 or 5 hours and then come back and see if there is water in drain pan. You might want to put a large pan underneath to catch any water that overflow from the drain pan. If there isnt any water upon returning then the cooling deck more than likely has a leak and will need replaced. If you have not done one of these you might want to see if there is a tech in your area and have them replace it for you. You can plug it into the wall to run it. Five years is on the low end of expected life, but not ridiculously so. To remove it, unscrew the large bolts on the bottom holding it in, remove the long panel on the front right side, and remove the plastic tab that holds the power cord to the side of the wall. Now it should slide right out. If it doesnt it might have a block of ice keeping it in place. Does it open very easily. Gunk gets crusted on the side of that door, and if its sticky enough that the door doesnt open easily, that can cause it. Now, all right thinking vendors have Grab mode turned on, so it doesnt work, but that doesnt stop the kids from trying it sometimes. I received the new compressor and still am a little unsure of how it installs. Right under the compressor I couldnt really do the unplug and defrost test because it is too long of a drive. I will implement the other advise and thanks for the help with all of this. If someone has messed with the machine they could have popped it off the track or broken the little plastic guides which causes the right side of the elevator to to

move front to back as it moved up and down and can cause a misalignment with the door and causing the bottles to get stuck on the elevator belt. Its easy! Sign in here. <http://gorod-r.com/userfiles/canon-speedlite-580ex-ii-manual-svenska.xml>

Page 3 GENERAL INFORMATION GENERAL INFORMATION PHYSICAL CHARACTERISTICS  
DN5000 VENDER SAFETY PRECAUTIONS Please read this manual in its entirety. This service information is intended to be used by a qualified service technician, who is familiar with proper and safe procedures to be followed when repairing, replacing, or adjusting any DixieNarco vender components. The machine is set up with 5 Trays, 9 columns or 6 columns each, 8 products per column. Maximum capacity for DN5000 is 15 cases 360 items of 20 oz. Product and DN3000 is 10 cases 240 items of 20oz. product. INSTALLATION AND SET UP INSTRUCTIONS Open the service door on the right side using the key provided in the coin return cup, or if shipped with a locking clip, remove the clip and install the lock. When money is inserted, the display indicates the total amount of the deposit. The keys on the keypad are used to select the product. Press key number 1 will return to "VENDMECH" if all vend mech errors have not been cleared. If all vend mech errors have been cleared the next error mode will be displayed, or "NONE" if there are no errors. Press key number 1 will return to "ERROR". Page 10 PROGRAMMING "REFRIG" Refrigeration Summary Errors Press key number 4 and the display shows one of the following "TEMPSENS", indicating the temperature sensor is defective or unplugged. "TOO COLD", indicating the cabinet temperature is 3 0 F below lower limit. "TOO HOT", indicating the cabinet temperature is 3 0 F above upper limit. "NO COOL", indicating the cooling system has failed to decrease temperature 10 F per hour while the compressor is running. Page 11 PROGRAMMING "TESTMODE" TEST ROUTINE This function allows you to diagnose different functions of the vender. Press key number 4 and the display will show "TESTVEND". Press key number 2 or 3 to scroll through the test routines available. Press key number 1 to return to "TESTMODE". "TESTVEND" Vend Testing This function allows you to test vend each column.

Press key number 4 and the display will show "COL A1". Press key numbers 2 or 3 to scroll through the columns available to run in motor test. Note Leading zeros are not displayed. Example Display flashes "CASH", then "262500". For the 7 options available, see list below. Press key number 2 to scroll through the options. Press key number 4 with the desired option showing on the display to save that option and return to "STS PROG". Note This routine is lockable when using a data collection device. If you press key number 4 and the display shows "LOC", this means configuration setting changes will not be allowed. If "CON 1" is displayed, then configuration setting changes will be allowed. "LOC" can only be enabled or disabled through DEX interrogation. Page 15 PROGRAMMING CON 6 Configuration Switch 6 Reserved This code is reserved for future use. Press key number 2 to scroll to "CON 7". CON 7 Configuration Switch 7 Save Credit This code is used to determine how long a credit will be saved. C7 0 will save the credit for five minutes. CON 7 1 will save the credit indefinitely. This function has to be turned on to be able to allow consumer overpay. Note This does not change the menu prompts. Press key number 4 and the display will show the language currently set in the controller. Press key number 2 or 3 to scroll through the languages available. Page 18 PROGRAMMING "DST" Daylight Saving Time Setting This function is used to set the preferred daylight savings time setting. Press key number 4 will display the current setting. Press key number 2 or 3 to scroll through the "DST" options listed "OFF", no daylight savings time changes made. "AUSTRAL", Australian rules Set forward 1 hour at 100 am on the first Sunday in October; Set backward 1 hour at 100 am on the last Sunday in March.

<http://www.bosport.be/newsletter/canopus-adv110-converter-manual>

Page 19 PROGRAMMING "STOP HR" Stop Hour and Minute Setting This function is used to set the hours and minutes to stop light conservation and can be set in the same manner as Start Hour and Minute Setting. Press key number 1 to return to "STOP TIM". Press key number 1 to return to

"LIGHTING". Press key number 4 will enter "ENABLE X". Press key number 4 and "DEGREESX", where the current setting X will be blinking. Press key number 2 or 3 to scroll between DEGREESF and DEGREESC. Press key number 4 with the display blinking the setting you wish to use. Press key number 1 to return to "DEGREES". Press key number 2 to scroll to "SETPPOINT". Page 21

PROGRAMMING "STRT DAY" Day of Week Start Setting This function is used to set the days of the week to start selection blocking. Press key number 2 or 3 to scroll between "XXXXXX0" and "XXXXXX1". Press key number 2 or 3 to scroll between "LIGHT0" and "LIGHT1". Press key number 4 with the display showing the setting you wish to use. Display will return to "LIGHTX". Press key number 1 to return to "SELBLCK1". Press key number 4 and ENABLE X will show on the display. "ENABLE X" Discount Setting Enable Routine This function is used to disable discounting "ENABLE 0" or enable discounting "ENABLE 1". Press key number 4 and the current "ENABLE X" setting will be displayed. Press key number 2 or 3 to scroll between "ENABLE 0" and "ENABLE 1". Page 24

PROGRAMMING "OVERRIDE" MANUAL SWITCH OVERRIDE ROUTINE This function is used to allow a key switch to override some of the settings stored for normal operations. This function can be programmed to control one or several of the following features Free Vend Enable, Selection Blocking, Discount Pricing, and Lighting Control. Press key number 4 and the display will show "FREE X". Press key number 2 or 3 to scroll through the override routines available. Press key number 1 to return to "OVERRIDE". Press key number 2 or 3 to scroll between "REFRIG 0" and "REFRIG 1".

Display will return to "REFRIG X". Press key number 2 to scroll to "RVNDMECH". Page 26

PROGRAMMING "VND RATE" Universal Satellite Device USD Vend Rate Routine This function is used to set the vend rate 0255. Press key number 4 and the current vend rate 0255 will show on the display. Press key number 2 to increase, or 3 to decrease the number in single digit increments. NOTE A rate of "0" disables the USD. When enabled, protected selections will only be allowed to vend if health constraints listed above are met. Press key number 4 and the current "ENABLE" setting will be displayed. Press key number 2 or 3 to scroll between "ENABLED 0" and "ENABLED 1". Page 30
