You may order presentation ready copies to distribute to your colleagues, customers, or clients, by visiting For many buyers, however, Durangos most appealing feature is its justright size. Based on the Dakota pickup, Durango is smaller and more maneuverable than the fullsize SUVs, such as the Ford Expedition and Chevrolet Tahoe. Yet Durango still offers sixpassenger seating, V8 power, and a hefty towing capacity. Dodge Durango has found a comfortable niche that Ford and GM missed.

With theaterstyle seating that gives rearseat passengers a view of the road ahead, and other interior creature comforts, the Durango is a smart choice for large families. Its also a good choice for people who tow light to mediumsized trailers. A beefy 5.9liter V8 is available, and it delivers plenty of pulling power, while the more sophisticated 4.7liter overheadcam V8 offers decent performance and an added measure of refinement. A new fivespeed automatic transmission is available for 2002 that should improve fuel economy. For 2002, Dodge has added a highvalue trim level called SXT with unique Graphite trim. These are the kind of folks that believe in keeping These are the kind of folks that believe in keeping a vintage automobile in original condition. Although I respect these people and their beliefs the act of keeping every nut and bolt issued from the factory isn't right for everyone. As for me, I prefer to drive my automobile to the car show. Furthermore, I want to enjoy the ride and arrive at the auto show safely. In order to achieve these lofty goals some of the original parts on my personal classic car required an upgrade. Not only did I want to arrive at a car show safely, but when things wrapped up I wanted to get in and have it fire right up to take me home. Nothing ruins an amazing day like having to call a tow truck to drag your classic car back to home base. So let's get into three classic car upgrades that make sense from a reliability and safety standpoint. From the factory the mighty Mopar came with a 45 amp alternator.

These types of low output units make your headlights appear brown at idle. Although these muscle car era alternators remain a major upgrade over the generators installed in the early 1960s, they still leave a lot to be desired. Even if your late 60s or early 70s muscle car came from the factory with an alternator, you probably still have an external regulator. It wasn't until the mid1970s when vehicle manufacturers started moving the voltage control function inside the alternator case. When an externally mounted voltage regulator develops issues it can limit the voltage output. It can also fail in the opposite direction. In this situation the battery will overcharge. And overcharge scenario boils away the water and acid fluid covering the lead plates. Symptoms of voltage regulator problems include a consistently dead battery and headlights that appear dim at idle. In an overcharging situation you can often hear a gurgling from the battery. You can find more information about this subject from this great article about charging system diagnosis and repair. With that said, charging system upgrade kits abound for popular muscle cars like the Chevrolet Chevelle and Chevy Camaro. This can become a dangerous situation. When you're driving behind a

modern car you need to allow extra space because of their ability to stop in half the distance as you. In an emergency situation this may not be enough. A single reservoir master cylinder is often found on older cars that use four wheel drum brakes. This single chamber design uses one fluid reservoir to supply brake pressure to all four wheels. Obviously, if the fluid leaks out you lose braking at all four wheels. As the 60s rolled on, car makers faced increasingly strict safety standards. Therefore, these American car manufacturers improved brake designs by adding disc brakes to the front. This provided an opportunity to use a dual chamber master cylinder.

The larger master cylinder chamber provides fluid for the front disc brake calipers. A dual chamber master cylinder allows the front and rear hydraulic braking systems to act independently of each other. Now, in the scenario of a hydraulic brake fluid leak on the front brakes, the driver can still use the rear brakes to slow the vehicle. And this is why a master cylinder upgrade makes my top 3 list of classic car upgrades. These cars didn't stop well. However, at least all of the automobiles on the road at that time stopped in the same total distance. The invention of antilock braking systems cuts the stopping distance in half when compared to a vintage automobile. For this reason it's recommended that classic car owners improve the braking system for regularly driven classic automobiles. This often requires the upgrade of the master cylinder as mentioned above. You can also add a vacuum operated power brake booster that multiplies the brake pedal pressure from the driver. Fortunately, this is one of those classic car upgrades that remain extremely popular. In fact, Entire businesses have grown to support disc brake conversion. Considering that this can save major damage to a significant investment and maybe even save a life, the money would seem well spent. You want to purchase a set of rims that suit your wheels and your car, and one that can make an impression. It is a robust rim but remains lightweight. This refers to cars that participated in competitions, and it is these wheels that have contributed to the evolution of rims. This is a very lightweight rim and is better for general driving as opposed to racing. It works well with different models of cars. The BBS Super RS is made of forged aluminum and has an eccentric multispoke design. The style can be best described as "old school" and is meant for giving your car the classic look. This is especially a great rim if you are a classic car or luxury car enthusiast.

As such, they are not cheap, but if you've got a luxury car or a classic car, why not go a step above. Instead of the standard spoke aesthetic, you will notice the rather oddshaped rings that replace the spokes. This may seem unusual at first, but it's what adds to the appeal of these rims. You can find a standard looking rim, or you can go for one that is wild if your car's personality suits it! If you are into customizing your car and standing out from others, you may wish to consider an ADV1 Rim. Additionally, it provides airflow for cooling. If you drive an American classic racing car, you may well find that the American Racing Vector is best suited for it. They are on the pricier side, in the thousanddollar range, so they are best suited for serious racing enthusiasts. While these are no longer in production, you may be able to still find them available for purchase. Usually, a store that specializes in vintage rims will carry these in stock. As they are a rare commodity, so you can really stand out if you add a set of these to your car. These are windmillshaped and are in a fivespoke design. They are now a rare commodity. While these never caught on, they were a favorite amongst models such as the 1993 Dodge Viper. These are multispoke designs that work well with classics such as the 1966 Jaguar EType. They also work with a variety of tires such as Dunlops, Daytons, and Borrani's. Having a vehicle that is both appealing and reliable is essential. With Having a vehicle that is both appealing and reliable is essential. With all the different automobile options on the market, selecting the best one is no easy task. Are you looking for a vehicle that is sensible and fuefficient. Does your new vehicle need more power for offroading When buying a Jeep Wrangler, you can take advantage of several unique and helpful features. While this newer model pays homage to the Wranglers of the past, it is definitely unique.

The main difference between the new Wrangler body style and the old one is the longer and wider

body. The four-door model is around 4 inches longer than previous models. These new Wranglers also have a larger wheelbase, which is perfect for traveling over rugged terrain. Accommodating this larger and thicker glass required Jeep engineers to get creative with how they structured this new Wrangler model. The team at Jeep understands their offroad-loving Wrangler audience extremely well. This is why the new Wranglers feature steel bumpers. These winches are a must-have for any offroading enthusiast that wants more versatility. If you are ever stuck, pulling yourself out should be easy with the help of your durable steel bumper and a high-quality winch. If you are looking for a great deal on a new or used Jeep Wrangler, be sure to visit this dealership. With their help, you can get the Wrangler of your dreams without overpaying. The newer model Wranglers come stock with six-speed manual Aisin D478 transmissions. Not only do these transmissions pack a punch, but they can also help to improve fuel efficiency. The mild-hybrid engine features in the new Wrangler is said to provide both fuel economy and plenty of offroad performance. The design team at Jeep has turned this notion on its head with the delivery of the powerful and efficient Wrangler. One of the biggest selling points of the Jeep Wrangler has always been its ability to climb hills and rock facings. As with many other features, the new Jeep Wrangler has taken the climbing angles it is capable of to a whole new level. Both the JK and JL Wrangler models have improved approach, breakover and departure angles than ever before. The Jeep Wrangler is a vehicle designed to make traversing rugged terrain easy and safe. Luckily, the new Wranglers feature 33-inch BF Goodrich tires. You can also upgrade the tires if needed. With this setup, getting over mountainous terrain will be easy.

These upgrades will provide you with more versatility and appeal. The last thing you want is to get stuck in your new Wrangler, which is why paying for the extra bells and whistles is a great idea. The first thing you will notice when getting in this vehicle is the push-button start and the 7-inch touchscreen display. Connecting your phone to your new Jeep Wrangler allows you to talk hands-free and listen to your favorite music. These features allow you to get the best mix of technology and old-school torque. This vehicle retains its value and will provide you with years of enjoyable driving experiences. If so, be sure to check out the other blogs on our website. In our opinion, you can never go wrong with a truck. Whether you're single or have a large family, trucks can support all lifestyles. After all, cars have great fuel efficiency, nice features, and decent safety ratings, don't they? However, we still think you're better off with a pickup. Keep reading to learn why. This can be especially useful during seasons of inclement weather. Trucks perform well in snow, rain, slush, ice, mud, and more. Cars, on the other hand, can often be found getting pulled out of sticky situations by truck owners. We get it, nothing is certain in our economy and you don't want to spend a fortune on gas. Fortunately, most newer trucks come equipped with technology that limits engine output when it isn't needed to help you save on fuel. Keep in mind, fuel efficiency in any vehicle can be improved based on how you drive. This could be trailers for work or campers and boats for recreational activities. Whether you're working on home improvement projects and need a vehicle capable of hauling building materials or are helping your friend move, a truck is a necessary asset. They can also be quite handy when it comes to transporting larger loads, such as gravel, dirt, equipment, and more.

They're big and sturdy, and in the event of hitting wildlife or colliding with another vehicle, you're going to be well protected. In fact, the Ram 1500 was the only truck to receive the Insurance Institute for Highway Safety Top Safety Pick Plus award in 2019. If so, as mentioned above, we really think you should consider buying a truck. However, before you make your choice, be sure to check out some of our other articles for more information about cars, trucks, vehicle maintenance, and more. Here's out how to find the source and repair it fast. It was powerful and had an eight-foot bed. It can get leaks just like any other vehicle. You'll want to diagnose and repair it as soon as possible. This is easy enough to do by checking the color of the oil. That will pick up the color much better than the ground. Transmission and power engine fluids tend to be red. If you haven't changed those fluids in a while, they could be brown or so dark you can't tell the difference between that and

engine oil. If that's full, check the transmission lines, especially in spots where there are clamps. If you suspect a leak around the hoses, clean and dry the area and put powder on the area to confirm your suspicions. If you see oil on the driver's side of your Dodge RAM 3500, it's probably power steering related. That can be a huge challenge. Use tracer fluid and an ultraviolet UV light. It's safe to use on any car or truck engine. Then shine your light on the oil. If it glows in the light, you confirmed the problem. Pinpoint the highest point in the path and that will be the source of the leak. They could choose between a Cummins diesel engine or a Magnum gas powered engine. For example, you could get a Cummins Turbo Diesel engine that has 900 lbs.ft. of torque. This is the choice for about 75% of Heavy Duty RAM owners. Depending on the year of the truck, you could get a V8 engine or a V10. You don't want to wait to take care of oil leaks.

If you're working with an early model Dodge RAM 3500, you're covered. This will take most of the guesswork out of the repair for you. The pump is lubricated by the engine, and if the shaft seal isn't working, you have an oil leak. That will ensure the sealing areas are secure and free of debris. Again, you're going to want to clean the area good to keep the integrity of the seal. Your 3500 is a powerful beast and can handle just about anything, just as long as it is maintained properly. It will save you from a damaged engine down the road. From the wheels to the wipers, you're protected. Explore Safety Find the perfect fit for your style with several packages to choose from.
