To get started finding Doorking Microplus 8069 Manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

Doorking Microplus 8069 Manual

Our coding and encryption schemes are not shared with other producers such as automobile manufacturers, resulting in Transmitter codes that cannot be duplicated or copied. The 8040 Receiver is also a lowpower draw unit designed specifically for the solar application. It remains in a "sleep" mode until it receives a signal from a Transmitter, thus drawing about 1 milliamp of power. This is the equivalent to leaving a copy of your front door key on the keyring when you hand the keys over to the new owner. This cant happen with MicroPLUS RF controls. MicroPLUS RF controls provide you with the highest level of security available with RF access controls. Our coding and encryption schemes are not shared with other producers, resulting in transmitter codes that cannot be duplicated or copied. With MicroPLUS controls, you are assured that only the original intended transmitter will activate your access system. This receiver can also be programmed as a standalone device. It is also ideal for solarpowered applications as it has an extremely low power draw while in standby mode. Codes can be added or deleted individually, or in block format. Other programmable features include time zones, relay strike time and a print mode function. You must have JavaScript enabled in your browser to utilize the functionality of this website. MicroCLIK transmitters are factory coded to 1 of over 1 million available codes. These RF controls are ideal for singlefamily homes, gated communities, apartment complexes, business offices and industrial sites. MicroCLIK transmitter codes usually can be copied into the builtin transmitters found in many luxury automobiles; however we do not guarantee this commonality or functionality. Single and multi channel transmitters and receivers can be mixed and matched within product families to address just about any user need. Our popular Micro Klik Line offers over a 1,000,000 codes interfaced with 26 or 31 bit weigand controllers DoorKing gate operator and garage door remotes provide convenience and security. These high end transmitter use high levels of security like the micro click with wiegand readers. DoorKing Inc. is one of the largest and oldest manufacturers of access control and vehicular gate operator systems in the United States. DKS provides remote operation of vehicular access gates from the safety and convenience of a car or truck. The result is that copied transmitter codes are useless. Receivers are designed for high traffic multiuser applications. Over 268,000,000 MicroPLUS transmitter codes are available by the push of a button. Doorking Model 1812 Classic The model 1812 is a unique telephone intercom system that allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate without the necessity to pay for an additional telephone line at their home. With its "intercom mode" programming feature, the 1812 can also be connected to a PBX or KSU type system, making it ideal for small businesses to control access through a single door or gate.

Visitors are easily identified by voice communication and can be granted or denied access directly from a touchtone telephone. The 1812 is available in both surface and flush mount designs and includes the DKS autoprogramming software for Windows, allowing homeowners to program the system right from their home computer. The 1812 is available in three distinct styles Surface mount, Flush mount and Wall mount. Camera kits available. Wireless kits available for 1812 Access Plus model. ADVANCED FEATURES PC Programmable. Distinctive double ring identifies visitor calls from regular calls. Call waiting. Call forwarding. 3 preprogrammed call out telephone numbers. "Do Not Disturb" time zone. Hold open time zones. Builtin time clock. Click here for brochure Doorking 1812 Doorking 1835 PC Programmable The Model 1835 is an ideal telephone entry system suited for apartment and gated community applications as well as office buildings and industrial sites that have a separate access control system, or require telephone entry only. Our unique "One Touch" CALL button makes this system one of the easiest to use on the market today. The builtin electronic directory, easy to use Remote Account Manager programming software, card reader interface and expandability options make this unit an ideal choice for those applications with a large number of system users and entry locations. Up to 16 card readers can be interfaced with the 1835 to provide access control. Additionally, our elevator control module restricts which floors a guest or system users have access to, making it an ideal system for high rise buildings. For additional security, the 1835 allows you to monitor activity AS IT HAPPENS on your computer display requires RS232 connection, and with our antipass back memory, you can enable a TRUE antipass back system in one of three different configurations; passive, active and trap. Note 4 Programming via several methods. Internet programming requires IM Server Modem subscription.

Remote Account Manager and Transaction Analysis software is included with the system. Large easy to use A and Z scroll buttons. One Touch "CALL" button. Builtin singleline LCD directory display. Programmable directory codes 14 digits. 10 and 11digit dialing capability. Live Streaming. Live transactions. Antipass back. 8000 event transaction buffer. 31 Security permission levels 29 Programmable 2 fixed levels. LED Lighting illuminates keypad. Holiday schedule. Hold open time zones. Entry code time zones. Builtin postal lock provision. Specifications True Full Duplex Communication. Stores up to 3000 telephone numbers and names. Stores up to 255 area codes. Transaction buffer stores last 8000 events. Three antipass back configurations passive, active and

trap. Elevator control note 1 for up to 8 elevators, each serving 64 floors. Expandable note 2 to control up to 24 entry points. 4digit entry codes, one for each telephone number. 3 form "C" dry contact relays. EEPROM memory chip. Requires touchtone, loopstart central office phone line. Two 16 VAC, 20 VA power transformers supplied. Program from the keypad or from an Android Smartphone with the DKS Manager App. Wrong code lockout settable from 39 tries and 19 minutes. Low power mode for solar applications. Single Form C dry contact relay. Operates on 12 to 24 volt AC or DC power. Six 5digit entry codes. Two Form C dry contact relays. Time zone inputs. Secondary keypad capability. Operates on 16 volt AC power. Real time print mode. Form "C" dry contact relay 16 VAC, 20 VA power transformer supplied. Doorking Barrier Gates Doorking 1601 The 1601 operator is designed for single lane 14 ft. The 1601 operator is designed so that it can be mounted on either the left or right hand side of the roadway. The operator can be equipped with a DC convenience open package optional that will automatically raise the arm in the event of a power outage.

The breakaway arm is not an option when the 1601 is equipped with the convenience open option. Doorking 1602 The 1602 operator is designed for traffic lanes up to 20feet wide in low use commercial and industrial applications. This operator uses a counterbalanced threepiece wishbone style arm assembly. The 1602 operator is designed so that it can be mounted on either the left or right hand side of the roadway. The operator can be equipped with a DC convenience open package optional that will automatically raise the arm in the event of a power outage. Traffic Control Doorking Speed Bumps and Traffic Spikes Standalone Traffic Control Spike Systems Surface mount spikes install easily without trenching and double as a speed bump Spring loaded surface mount available in 3 foot sections Flush Mount below ground assembly available with weighted or spring loaded spikes Traffic control spikes are ideal for controlling traffic direction and speed through a controlled entry location. Traffic spikes prevent vehicles from proceeding through a traffic lane in the wrong direction by enforcing oneway traffic lanes. Flush mount spikes are available with Spring Retraction or with Weighted Retraction. Speed bumps force drivers to slow down while driving through the controlled entry point. They are also ideal for keeping vehicular traffic at a safe speed while driving over traffic spikes.
