In fact I haven't had much hands-on time with this phone Mum denied me the fun I get from playing with new tech toys by setting it up herself. One thing that was confusing between this and other sellers was the availability of the charging cradle.

The phone was supplied with USB power brick, USB cable and charging cradle. In fact the only thing I had to do when I visited my mother was to plug the USB cable into her digital video recorder. This was to fix the one small fault with the phone, if the battery goes flat the clock stops. Since the DVR is always on so all she has to do is to drop the phone into its charging stand without worrying about leaving the charger switched on and wasting power when she isn't using it. She is now nagging me to teach her how to text. However I bought a Blackberry because I can't text to save my life. If my niece is reading this, you have a job to do at Nannys Plus points The package comes with charging station as standard Good clear menus Mum got started without me. Stores important medical details. Negatives No secondary battery backup on the clock. Given the sales pitch my mother is doing for

this phone there may be limited supply of handsets. In February 2014 I purchased this phone from Amazon. After 3 months the phone went completely dead. I contacted Doro and they told me to send it back and they would look at it. At my expense, I returned the phone and after 2 weeks waiting, I received a repaired phone. The following month the phone completely failed again. It would not work or charge. This time I asked for Doro to pay the postage and they said they would send a Jiffy bag. One week passed and I rang them back asking where was the Jiffy bag. They sent one this time and a week after I received a new Doro 615 Red mobile. This one worked for nearly a month and then, as with the others, completely died. I reported the failure of my new Doro to the Technical Service at Doro and again I requested a Jiffy bag. Again I waited a week and nothing arrived from Doro so I rang again to ask for a Jiffy bag. They said they will send one out to me today.

Whilst waiting for the Jiffy bag last week I decided to email Doro to explain all the above and express my disappointment in their product and their customer service. I received a reply implying that the last two returned phones had damaged charging ports. This was remarkable as the phones were only charged using the cradle supplied. I hope the time I have spent reviewing this Doro product will make future customers of Doro aware that this product and the customer service that comes with it, is to say the least, challenging on ones patience! Please try again later. From United Kingdom So really I am not the person to review this. In fact I havent had much handson time with this phone Mum denied me the fun I get from playing with new tech toys by setting it up herself. One thing that was confusing between this and other sellers was the availability of the charging cradle. The phone was supplied with USB power brick, USB cable and charging cradle. In fact the only thing I had to do when I visited my mother was to plug the USB cable into her digital video recorder. I hope the time I have spent reviewing this Doro product will make future customers of Doro aware that this product and the customer service that comes with it, is to say the least, challenging on ones patience! Please try again later. Please try again later. Football Playing Kitten 4.0 out of 5 stars Perhaps the Windows ones with big tiles might work, especially the older ones WP7.x that are much cheaper but have big screens. If you dont need the camera consider the cheaper versions of this phone, even the old 409. There are also versions with smaller displays but I would go for the biggest display you can afford.

Also watch the prices for older models, they may be all you need for less. Please try again later. Please try again later. Pisces 4.0 out of 5 stars After that everything else was very easy.

I charged the battery for a couple of hours and then the phone automatically guided me through the basic setup procedures and then the phone was ready to use. Also, the instruction booklet is reasonably easy to understand if you want to alter settings afterwards. It is a very basic phone texts, phone calls, camera and a radio and the reason I have only awarded it 4 stars is because I think the price is rather high for what you actually get. However, the phone is very easy to use for us oldies and I hope it will last for a few years. Please try again later. Please try again later. GBR 5.0 out of 5 stars We tried a Nokia from Vodafone, but she couldn't cope with it keyboard and screen too small. The Doro works brilliantly. The menu system is simple and intuitive, and she managed to set up the phone without consulting the manual. It does everything she needs, namely phone calls and text. It has a decent camera too which she likes. It has very good predictive text, so texting is simple. Because of the flip phone design, you get a large keyboard and screen which is very easy to use, and the text size can be increased to large, which means she can now read a text message without her glasses. Speed dial numbers are easy to set up, and there is an emergency button on the back of the phone. By pressing this for 3 secs, the phone will text and then call a series of preprogrammed numbers until someone answers and presses the zero key. My wife does not need this feature, but it could be a godsend for an elderly person living alone. The phone also has an FM radio, and bluetooth connectivity. All in all, it is the perfect solution if all you want is a basic cellphone for calls and text. Please try again later. Please try again later. Jambin 5.0 out of 5 stars The buttons and screen are clear and easy to use. The instructions are comprehensive if a little confusing due to complexity. The phone on the other hand is intuitive and easy to set up.

The hardest area to cope with is texting and that is due to it being slightly less versatile than the Nokia system. It is just a matter of forgetting old ways and learning the new. All essential text features are there. The Camera is better than expected and very useful when a bespoke camera is not available. Downloading to a laptop has proved easy via USB cable. I have switched the phone to 3G and I have found battery life very acceptable with 56 days of standby easily achieved on a phone which makes limited calls. Please try again later. Please try again later. Donna 1.0 out of 5 stars Shame as everything seemed to be just what I was looking for in a phone, must say this may well of been just a one off problem. But no I could not recommend this phone to anybody that needs to have reliability, as this proved to be unreliable. I did however receive a full refund without question but that's not the point Just wanted a great phone that worked! Please try again later. Please try again later. Teresa 5.0 out of 5 stars She is really pleased with it. Very easy for her to use, much bigger buttons and clearer screen than most other phones and it still looks amazingly stylish too. The phone is not any bigger than a standard mobile phone too and has its own charging cradle so there is no fiddling with wires if hand mobility is reduced. The best phone I have brought to date for my 80 year old Mum. Thank you Doro. Please try again later. Please try again later. MP 184 3.0 out of 5 stars This needs to be programmed in upon arrival. Expect a couple of accidental calls but gives real peace of mind. The buttons and text are a helpful size. The only downside for me was not being able to back it up on enter numbers from a PC and also not being allowed to put a ring tone on there. The relative had been used to a particular ring tone and has spoiled their enjoyment of this particular product. Please try again later. Please try again later. Mr. A. Mason 5.

0 out of 5 stars Please try again later. Please try again later. You can edit your question or post anyway.
