As a selftaught craftsman, I've frequently needed manuals and books to help myself set up or operate complicated machines. That is why I started this service with my family to make hardtofind manuals easier for other craftsmen to obtain. I wanted to make the best quality, printed manuals to work with in a shop. After all, I remember the day when they didn't even have computers. We make some ofThe duck call pictured has over 1,117 individual pieces of wood in it. You can learn more about our shop on our About Us page, or Ozarkwoodworker.com. That is why we started Ozark Shop Talk Blog to give back to the many people that have helped us learn. We are selftaught machinist and woodworkers, and we had to use the HowTo Books, and information in the manuals to learn ourselves. It was operating smooth and semiquiet until I started to make a second cut for a puzzle. They do not conduct electricity. There are however, brushes inside of the motor that may be at fault. Secondly, there may be an alignment problem with the scroll arm, or frozen bushing there that is causing the trouble.I replaced the speed control unit 2615303002 along with the potentiometer control and it didnt help it still goes full blast.
