### Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Driverack 260 Manual . To get started finding Driverack 260 Manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# Driverack 260 Manual

The 260 capitalizes on the road tested and contractor approved nature of the other products in the DriveRack line. The 260 provides full bandpass and crossover configurations as well as independent output processing and a full time RTA for live sound applications. The DriveRack 260 continues the legacy of DriveRack series, which has been created by the company that has been redefining the standard of signal processing for more than 30 years. The DriveRack 260 was designed with the purpose and vision of providing stateoftheart signal processing, while utilizing a simple and intuitive user interface. XLR RTA Mic input It runs on phantom power supplied by the Driverack units and comes with a clip and case. With the DriveRack 260, dbx Professional Products has redefined the standard by which all other loudspeaker management processors will be compared. The DriveRack 260 was designed with the purpose and vision of providing stateoftheart signal processing, while utilizing a simple and intuitive user interface. For more information, please visit [www.driverack.com](http://www.driverack.com) or [www.dbxpro.com](http://www.dbxpro.com). This manual will be your guide to understanding the full functionality of the powerful DriveRack 260. By combining the different components, the configuration possibilities are limitless. After you have become familiar with the unit, we encourage you to experiment and find the most effective and efficient way to run your system by utilizing the powerful processing of the DriveRack 260.

### 0.1 Defining the DriveRack 260 System

The dbx DriveRack 260 is the most effective way to manage all aspects of post mixer processing and signal routing. The DriveRack 260 essentially becomes the only device that you will need between the mixer and the power amps. The following are just some of the features of the DriveRack 260. The lightning flash with arrowpoint in an equilateral triangle means that there are dangerous voltages present within the unit. The exclamation point in an equilateral triangle indicates that it is necessary for the user to refer to the owner's manual. Do not open the unit. Do not attempt to service the unit yourself. Refer all servicing to qualified personnel. Opening the chassis for any reason will void the manufacturer's warranty. Do not get the unit wet. If liquid is spilled on the unit, shut it off immediately and take it to a dealer for service. Disconnect the unit during storms to prevent damage. If the attachment plug needs to be changed, refer servicing to qualified service personnel who should refer to the table below. Severe injury or death can then result if the chassis and earth ground are touched simultaneously. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or third prong are provided for your safety. If the provided plug does not fit your outlet, consult an electrician for replacement of the obsolete outlet. Servicing is required when the apparatus has been damaged in any way, such as powersupply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped. For rackmount or installation where plug is not accessible, an allpole mains switch with a contact separation of at least 3 mm in each pole shall be incorporated into the electrical installation of the rack or building.

Connect this equipment only to the power source indicated on the equipment rear panel. To reduce the risk of fire or electric shock, refer servicing to qualified service personnel or equivalent. Operation is subject to the following two conditions Discard the mains plug at a suitable disposal facility. Replacement fuse covers can be obtained from your local retailer. Replacement fuses are 13 amps and MUST be ASTA approved to BS1362. For over 30 years, dbx has been the industry leader in With the DriveRack 260, dbx Professional Products has redefined the stan For more information, please visit [www.driverack.com](http://www.driverack.com) or The 260 DriveRack essentially becomes the only device that you

will need between the mixer and the power amps. The ZC2 provides programmable Volume and Mute control. The ZC3 allows Program Selection on the 260. The ZC4 also offers Program Selection via Contact Closure inputs for Room Combining applications. The ZCBOB was created to accommodate "homerun" or parallel wiring to the unit. With a maximum length of 5,000 ft., the Zone Controllers offer a simple way to create a simple yet elegant solution to many installation applications. Be prepared to accurately describe the problem. Know the serial number of your unit this is printed on a sticker attached to the top panel. If you have not already taken the time to fill out your warranty registration card and send it in, please do so now. Make sure you have correctly followed installation steps and operation procedures. If you are still unable to solve a problem, contact our Customer Service Department at 801 5687660 for consultation. If you need to return a product to the factory for service, you MUST contact Customer Service to obtain a Return Authorization Number. After expiration of the warranty, a reasonable charge will be made for parts, labor, and packing if you choose to use the factory service facility. In all cases, you are responsible for transportation charges to the factory.

Mark the package with the name of the shipper and with these words in red DELICATE INSTRUMENT, FRAGILE. Insure the package properly. Ship prepaid, not collect. Do not ship parcel post. Proof of purchase is considered to be the burden of the consumer. A Return Authorization number must be obtained from dbx by telephone. The company shall not be liable for any consequential damage as a result of the products use in any circuit or assembly. In no event shall dbx or its dealers be liable for special or consequential damages or from any delay in the performance of this warranty due to causes beyond their control. An IEC cord is included. EU version accepts 220V/240V at frequencies from 50Hz/60Hz. Note dbx Professional Products recommends that power amplifiers connected to the DriveRack 260, should be powered down prior to cycling the power on the DriveRack 260. The display will also notify the user if any internal clipping is taking place within the unit by displaying "CLIP" in the display. The functions of the aforementioned buttons are as follows Successive presses will move you through the When pressed and held, the 260 When pressed and held, the 260 will enter METER mode. When pressed and held, the 260 will enter the PROGRAM DELETE module. When pressed and held, the 260 will enter the Wizard section which includes SYSTEM SETUP, AFS and AUTO EQ WIZARD. These meters monitor the signal level right after the input module. The display provides you with a clear and concise overview of each aspect LCD Display All operational information of the 260 DriveRack is displayed here. The display will also notify the user if any internal clipping is taking place within the unit. The following message will appear CLIP. Data Wheel The data wheel is used to scroll through the program menu of the 260 DriveRack. The Data Wheel is also used to perform editing functions to effects and utility menu features. Button Array Operational editing is done using this 12 button array.

A complete description of each button's functionality is listed below. Input meters These two 6segment LED meters monitor the input level of the 260 DriveRack directly after the input mixer. Output mutes These six mute buttons are used to mute the output signal of the 260 DriveRack. Output meters These six 6segment meters monitor the output levels of the 260 DriveRack directly after the output gain stage. Threshold meters These six 1segment meters show that threshold level of the output dynamics has been exceeded. This feature of the 260 DriveRack allows for quick and accurate venue setups. The menu section of the Wizard offers System setup, Auto EQ and AFS Advanced Feedback Suppression. The following will walk you through your venue setup. To select any one of the three options, rotate the wheel. If you are performing the System setup, press either the button or the wheel and the display will appear as follows Once you have selected your input option, press the button and the display will appear as follows Once you have selected your EQ option, press the button and the display will appear as follows Once you have selected your Insert 1 module option, press the button and the display will appear as follows Once you have selected your

Insert 1 module option, press the button and the display will appear as follows Once you have selected your Main speaker option, press the button and the display will appear as follows Once you have selected your SUB speaker option, press the button and the display will appear as follows Note that the top line of the display will either read High, Mid or Low depending on your selected speaker setup selections. Once you have selected your Amp tuning option depending on the amp type, you will select the specified amplifier sensitivity setting if applicable. Once set, press the button, and you will now be given the option of optimizing your amp levels with the 260 DriveRack for.

The page will appear something like this Note that based on your amp selection, the 260 DriveRack will initially display the recommended setting of that particular amp for obtaining maximum headroom. This is done to match unity gain from the 260 DriveRack and your amplifier. Note that if Sub Speakers are included in the speaker selection, you will be asked if the sub woofer is bridged or mono. For more information regarding Amplifier gain settings, please refer to the System Setup and Gain Structure information located in the appendix section. Amplifier parameters are used to set the limiters to stop amplifier clipping and balance out the crossover levels. You may find that you want to readjust the crossover levels based on your taste and type of music. The Auto EQ Wizard automatically adjusts the response of the system by producing pink noise and adjusting the Graphic EQ until the RTA matches a selected response. From the 260 DriveRack Wizard menu, rotate the wheel until the display appears as follows Once you have selected your desired EQ Frequency response, press the button and the display will appear as follows Connect an RTAspecific microphone to the rearpanel RTA mic input. Once the Pink level has been adjusted to the desired volume. The mic level indicator will register the signal level. Press the button and the Auto EQ sequence will begin. The display will either show the graphic EQ or the RTA. Rotating the wheel clockwise and counter clockwise will toggle between the two modes. You can also select either mode to default to in the Utility menu. Regardless, the display will appear something like this If you are using independent left and right graphic EQs, you will auto EQ each side independently. If you are using a stereolinked EQ, both sides will be EQ'd simultaneously. Auto EQ can be aborted at any point in the process by pressing the button.

Upon completion of the Auto EQ Wizard, you can return to program mode by releasing the button and pressing the button. The AFS Wizard will lead you through the setup of of the fixed filters of the AFS module. The fixed filter mode is designed to place notch filters as you introduce feedback by opening up your mics and slowly increasing the gain. Because the fixed mode is sensitive, it is important not to present an external music source such as CD player or other audio signal into the system. From the Wizard menu, rotate the wheel until the display appears as follows This will range from values 012. Live and Fixed filter types differ in that FIXED mode filters are automatically assigned to a frequency creating feedback, thus remaining at that frequency until cleared by the user. In LIVE mode, live filters automatically detect and remove feedback frequencies in the presence of audio music or speech. When all of the live filters have been used, they begin to round robin. Essentially this means that the first filter set is replaced where a new feedback is detected and notched out. Once the desired fixed number of filters has been selected, press the button and the display will read. A blocked out F or L indicates a filter that is set, or in use. Once the desired number has been selected, press the and the display will read This means that a higher Q will produce a filter that is more narrow. To guarantee that feedback is suppressed at lower frequencies, the AFS may place wider notch filters at these lower frequencies below 700 Hz. Once the desired fixed type has been selected, press the button and the display will read Once the desired level has been set and all of the fixed filters have been assigned, the unit will automatically move you to the page that indicates the fixed filter setup has been completed.

If you have reached the performance level setting and all of the fixed filters have not been used, you may want to return Regardless, once you have completed the setup, the display will read For more

information regarding feedback elimination, please see the AFS parameters of the Detailed parameters section. The Data wheel is also used to change the values of the selected parameter by simply rotating the wheel. Pressing the Data wheel will toggle between the available parameters on any selected page of the currently selected effect module. This is the EQ section located prior to the crossover section. Successive presses will rotate through the various precrossover 28 band EQ and Postcrossover PEQ section modules. Successive presses will move through each input and output. When pressed and held, you will enter Config mode. When pressed and held, the 260 will enter METER mode. From program mode, press the EQ button to reach the EQ module to be edited. Successive presses of the EQ button will move through each channel. From program mode, press the XOVER button. Successive presses of the Other button will move you to each of the various insert modules available. Pressing the Data Wheel will select the effect parameter to be edited. Once you have reached the Dynamics module, Inf1 Gain 20 to 20dB Pressing the Data Wheel will select the effect parameter to be edited. Pressing the Data Wheel will select the effect parameter to be edited. Pressing and holding the Utility button will enter you into the meter menu. Everything you need bundled into one simple, tidy, portable package. Well, you may think your powered speaker system is complete, but you're missing half the picture. DriveRack PX is the other half. In another dbx industry first, they've created a processor specifically tailored for powered speakers. Utilizing their highly acclaimed DriveRack technology, the PX picks up where your powered speakers leave off. It even includes stereo or mono subwoofer support.

With the included dbx M2 measurement mic, AutoEQ corrects for audible deficiencies in the room environment. Your ears, your audience, and your powered speakers will forever thank you. Dbx's exclusive Setup, AutoEQ, and AFS Wizards, and outofthebox support for a host of JBL and other popular powered speakers, make setup a snap. Louder, cleaner, better sound than you thought possible from your powered speakers. Very convenient unlike the other sites, no popup windows or redundant pics. I believe the download here is faster, and there are no ads at all. But this one is kind of more of my thing. It's constantly improving and developing. Both file upload and download are very convenient. Services Sync music, Manage music, Recover missing metadata, Record CDs Download MediaMonkey Now Buy MediaMonkey Gold Get Addons Never use any other conversion tool again. Find Music File Converter Mp3 Mp3 converter [www.easypdfcombine.com](http://www.easypdfcombine.com) Merge And Convert Files Into PDFs For Free With EasyPDFCombine App. Very convenient unlike the other sites, no popup windows or redundant pics. Here I've already downloaded seven files, and there were no fails. Recommended. I believe the download here is faster, and there are no ads at all. Services Sync music, Manage music, Recover missing metadata, Record CDs Download MediaMonkey Now Buy MediaMonkey Gold Get Addons Never use any other conversion tool again. Find Music File Converter Mp3 Mp3 converter [www.easypdfcombine.com](http://www.easypdfcombine.com) Merge And Convert Files Into PDFs For Free With EasyPDFCombine App. An IEC cord is included. The EU version accepts 220V/240V at frequencies from 50Hz/60Hz. Pressing the Data Wheel will select the effect parameter to be edited. Pressing the Data Wheel will select the effect parameter to be edited. Pressing the Data Wheel will select the effect parameter to be edited. For some configurations, you may be able to simply select one of these presets as a starting point and edit the program from there.

You are now in the PreCrossover EQ module. The upper lefthand corner of the display indicates what EQ type is currently selected. The A and B indicators indicate which input is currently selected. You are now in the Crossover module. The upper lefthand corner of the display indicates what Crossover type is currently selected. Rotate the DATA wheel to select the Crossover type. Pressing and then rotating the DATA wheel lets you link or unlink the Output Delay modules as desired. FIXED mode is used before the performance without any input signal. In LIVE mode, the live filters automatically detect and remove feedback during the performance. When all of the live filters have been used, they begin to round robin. This is done by selecting a desired Target output level and Window. The AGC keeps the signal within the Window about the selected Target by slowly adjusting

the gain. Up to six Notch filters are available for all six outputs. This lets you choose the exact knee that is needed for the dynamic effect you are looking for. If you are unsure where to set this parameter, a setting of 4 is a great place to start. Rotate the DATA wheel to select the desired Panel ID number options are 16. When the Security Level function parameter is selected, rotating the DATA wheel is used to select which function you would like to set the security for. Connect the supplied dbx Null Modem cable between the computer's RS232 port and DriveRack's PC RS232 port. The cable must be wired like this DB9 femaletofemale null modem cable Important Note. A straight through RS232 cable will not work with the DriveRack. To enter the Utility Menu, RightClickhold on the top bar of the program edit window. Common NEC designations which meet this rating include CMP, CMR, CMG, CM and CMX. To wire in series each Zone Controller must have an identification or zone number chosen using the DIP switches on the side of the controller see diagram A.

If using a single ZC, the ZC may be connected directly to the DriveRack 260. Note that the six included applications represent the extensive flexibility of the DriveRack units. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so. Gain structure refers to aligning the gain of each device so that they all clip at the same point, and the noise floor of the entire system is at its absolute minimum.
