Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Driverack Px Powered Speaker Optimizer Manual . To get started finding Driverack Px Powered Speaker Optimizer Manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

Driverack Px Powered Speaker Optimizer Manual

Everything you need bundled into one simple, tidy, portable package. Well, you may think your powered speaker system is complete, but you're missing half the picture. DriveRack PX is the other half. In another dbx industry first, we've created a processor specifically tailored for powered speakers. Utilizing our highly acclaimed DriveRack technology, the PX picks up where your powered speakers leave off. The DriveRack PX Powered Speaker Optimizer has everything you need to get the most out of your stereo powered speaker system. It even includes stereo or mono subwoofer support. With the included dbx M2 measurement mic, AutoEQ corrects for audible deficiencies in the room environment. Your ears, your audience, and your powered speakers will forever thank you. Our exclusive Setup, AutoEQ, and AFS Wizards, and outofthebox support for a host of JBL and other popular powered speakers, make setup a snap. Louder, cleaner, better sound than you thought possible from your powered speakers. XLR RTA Mic input. The lightning flash with arrowpoint in an equilateral triangle means that there are dangerous voltages present within the unit. Page 3

IMPORTANT SAFETY INFORMATION ELECTROMAGNETIC COMPATIBILITY This unit conforms to the Product Specifications noted on the Declaration of Conformity. It even includes stereo or mono subwoofer support. With the included dbx M2 measurement mic, AutoEQ corrects for audible deficiencies in the room environment. Be prepared to accurately describe the problem. Know the serial number of your unit this is printed on a sticker attached to the bottom panel. If you have not already taken the time to fill out your warranty registration card and send it in, please do so now. Before you return a product to the factory for service, we recommend you refer to the manual. An IEC cord is included. EU versions accept 220V/240V at frequencies from 50Hz/60Hz. The display will also notify the user if any internal clipping is taking place within the unit. <http://dodatnagarancija.com/userfiles/craftsman-easy-start-weed-eater-manual.xml>

The display provides you with a clear and concise overview of each aspect of the signal path from the input to the output section. These allow for quick and accurate venue setups. There are three wizards Setup, EQ, and AFS. Press hold any button in the Wizard section of the front panel to access them. If the speaker being used is not specified in the menu, select CUSTOM. Note that you can scroll by category by pressing the Select knob and placing the arrow next to the category heading above the speaker name. Press the Select knob again to place the arrow next to the speaker name to scroll by speaker name. Press RTA input button. The display is prompting you to connect an RTA specific microphone to the frontpanel RTA XLR input, and press the button. The AutoEQ Wizard automatically adjusts the response of the system by producing pink noise and adjusting the Graphic EQ until the RTA matches a selected response. The AutoEQ™ Wizard can be initialized at any time by pressing and holding the button. Rotating the wheel clockwise and counter clockwise will toggle between the two modes. You can also select either mode as the default in the Utility menu. AutoEQ can be aborted at any point in the process by pressing the button. This will range from values 012. Live and Fixed filter types differ in that FIXED mode filters are automatically assigned to a frequency creating feedback, thus remaining at that frequency until cleared by the user. For more information regarding feedback elimination, please see the AFS parameters of the Detailed parameters section. AFS AFS Press and release to enter the Feedback processing editor. Pressing the Data Wheel will select the parameter to be edited. AFS AFS The NEXT and PREV buttons scroll through the pages of selected module. Turn the Data wheel to select a preset; press the Data wheel

to load the preset. RECALL PRESET Currently loaded preset All presets RECALL Turn the Data wheel to select a preset. Press the Data wheel to load the preset. <http://gospel-pour-100-voix.com/fichiers/newsletter/craftsman-easy-fire-stapler-user-manual.xml>

3.11 Navigating the Store Section From preset mode, press the STORE button. Press and hold to enter the first page of the Powered Speaker Setup Wizard. Press to enter the dbx 120A Subharmonic Synthesizer editor. Press to cycle through compressor editor and output limiter editors. If AFS is Off, the filters are bypassed, and the algorithm is halted the filters are not updated. If AFS is On, the filters are active, and they are updated according to the current selected mode Fixed or Live. If Clear Live is selected, then if invoked the live filters are reset. If Clear All is selected, then if invoked all of the filters are reset. Likewise, if the number of Fixed filters goes up and thus the number of live filters goes down, then the last live filter set will be reset. It is generally not a good idea to use this feature without a subwoofer. A 2:1 ratio means that if the incoming signal is 2dB over the threshold the unit will compress the signal, and outputs a signal that only goes 1dB over the threshold. For light compression choose a lower ratio, while a heavy compression requires a higher ratio. A setting of Inf1 makes the compressor act more like a limiter. This allows the user to drive the speaker in its optimum frequency range and send each output separately for more efficient use of amplifier power. Appendix A.5 illustrates each of the available Filters. The signal present at the Main OUT outputs can be adjusted using a HighPass filter. Connect the outputs of the sub speaker to the satellite speakers. Software 1. Use the Wizard to set up a specific preset. Press and hold the button to begin. The Soft Reset resets all operating parameters except user presets. The Hard Reset Procedure will reset all preset information back to the factory defaults. All PowerUp Functions require a button to be pressed and held as the unit power is turned on. DriveRack PX PowerUp Button Functions Factory "Hard" Reset. Normal resetting will continue.

No user input will be accepted to exit or Filter Unlocked. The AutoEQ can be used to adjust your system to compensate for room effects, and to adjust the response of the entire system to your liking. After allowing AutoEQ to "pink the room," your system will sound tighter. The low end will have more definition, the mids will be more intelligible, and the highs can be tamed. StMainsMSub Stereo powered fullrange speakers with a mono powered subwoofer. StMainsSSub Stereo powered fullrange speakers with stereo powered subwoofers. Sub wSats Sub with Satellite System PRX515 2 JBL PRX515 fullrange speakers PRX515M518 2 JBL PRX515 powered fullrange speakers with 1 JBL PRX518 powered subwoofer. These tools can make your system more efficient and better sounding, but to get the best possible sound it is important to use these tools properly. In the DriveRack PX we have included a Wizard setup tool to help in system setup. If you use the Wizard to set up your DriveRack PX it will automatically set the limiters for some powered speaker selections. You have just maximized the gain through your system. These settings should give you maximum gain without clipping, another way of saying this is that when the output of your mixer is clipping you will also be at the clip point of your powered speakers. Everything you need bundled into one simple, tidy, portable package. Well, you may think your powered speaker system is complete, but you're missing half the picture. DriveRack PX is the other half. In another dbx industry first, they've created a processor specifically tailored for powered speakers. Utilizing their highly acclaimed DriveRack technology, the PX picks up where your powered speakers leave off. It even includes stereo or mono subwoofer support. With the included dbx M2 measurement mic, AutoEQ corrects for audible deficiencies in the room environment. Your ears, your audience, and your powered speakers will forever thank you.
