If you have any doubts as to your ability to install this exhaust system, please consult with your local motorcycle dealer. Read all instructions first before starting installation. Make sure the motorcycle and exhaust system are completely cool before starting the installation. Also, make sure the bike is secure on the sidestand or ideally a rear service stand during installation. Be sure to save all stock exhaust components for possible use later. HIGH PIPE ONLY Remove the passenger footpeg brackets. Attach the left and right side hanger brackets to where your footpeg brackets used to be, using the supplied 8mm x 35mm hardware.<http://h04ydivan.ru/userfiles/file/datamax-m-4208-manual-pdf.xml>

On 1999 and later models, you will need to relocate the stock rear turn signals or use the provided flush mount turn signals to use the TBR high mount exhaust. Slide the TBR canister onto the end of the S-bend pipe. Wipe off the excess sealant that will squeeze out. You can adjust the muffler position by rotating the slip-on pipe where it meets the header. Repeat on opposite side. Please remove this film before operation. You may need to twist and turn the S-bend a little to get it in the right place. Locate both tabs of the canister clamp out side of the spacer. Use the 8mm x 75mm hardware to secure it. Leave loose for now. Repeat on opposite side. Be sure to check for proper clearance between the exhaust system and swingarm. Run the bike and enjoy. It is normal for some white smoke to appear the first time you start the bike. Check for gaps or leaks. If you find a leak, a little high temperature silicon sealant should fix it. After 50 to 100 miles, recheck all fasteners for tightness. Store in a cool, dry place. For cleaning use a mild spray cleaner. Always apply cleaner or polish with a soft, clean cloth. Stainless Header System Polished stainless steel pipes will turn a light golden hue after a few heat cycles, this is a normal characteristic of high quality stainless steel. Chrome Header System Chromed header tubing will turn blue close to the exhaust ports, this is normal. To prevent corrosion you must keep the header pipes clean. Also, NEVER dyno test your bike with carbon fiber mufflers installed the intense heat and lack of cooling air can quickly cause the CF material to burn. Two Brothers Racing does not provide a warranty for burned carbon fiber. Aluminum Mufflers Use an aluminum or mag wheel polish such as Mother's to restore the bright

finish to factory spec. Warranty Two Brothers Racing products are intended for closed course competition purposes only, and therefore are sold "as is" without warranty. <http://www.bluwash.co.kr/userfiles/datamax-m-series-manual.xml>

And have disconnected a faulty speaker wiringI am interested to know my two wheelers wiring system. The basics of where the electricity is developed and how the system is operated. I need the wiring diagram pls.In theThe one which came with the bike is way too small for my eyesI am looking for a wiring manualsPpr favor si pudieranDoes it give something for this Bike. Or any Wiring Diagrams. Please give me an Answer, Thank YouCan you help Thanks you in advanceCan you help at all Thanks very muchI purchased it and it was delivered completely disassembled. I am having a lot of trouble with the wiring harness.I'm not sure what year it is but it's around 2009 or 2010 I believe. Thanks in advance.Can you please help me out with this request Thanks!Many thanksIt gets to hot after 10km I need a bigger jet. Please assist me and show me the correct part. The maschine is brand new!The part is the REAR RIGHT TAIL LIGHT COVERCan you helpOr someone that could work on it for me.

I nneed and engine manual that shows the parts breakdownI have pulled the connector pin from what looks like a molex connection. I need to know what size wire is to purchase the maleIndicators do work, horn also works. Electric start dont work just clicks and will not start of kick start any ideas please.Cant seem to find anything so this is my last resort.Any info would be amazing. Thank you so much in advance.Can someone help me Thank youThe wires for these coming outThis is a factory or a point of assembly issue. The connector has sufferedNot something we noticed until one by one failure in dash.Wiring was not placed and securedAll the wires have come out from the connector at the female side and three from the male side. Impossible to match up which goes back to what in

theWe need a schematic or photos of the connectors which wires to which on each side.Please help and thank you.Thank you JiriThe head gasket is blown Im guessing. It bubbles back into the reservoir when trying to start it, but no mixture in the oil. But Im having a awfulI either dont know how to word it correctly or if the person I got it from changed something, but its not like the few I have ran across. So any helpAnd also what about performance parts for it or racing parts. Thank you for your time and patients in helping me.I bought a motorcycle in pieces, I have various parts of the electrical installation, but I do not know how to connect it. Please helpI've searched the internet but can find a diagram any helpI am after a wiring diagram for a 2007 American Ironhorse Slammer. Could you please help.On duke 2019, 125cc.Any one who has the experience please help me.My headlights and turn signal lights do not work at all.It's a dirt bike.pitbike workshop Manuel or service Manuel if possible About 2000 model manual Please helpI dont know if its a F22 or F11 as I purchased it used. I need a part for it lower side panel I believe it to be. Any help is appreciated. Engine.

Trade Name ZNEN ZN50QT32 Vehicle Category AStart xmoto motorcycle dirt bikeGot stolen and they cut out the ignition and blew the wire harness. Thanks.Is there anyone out there who can help me outThere are still good people out there. Thanks again, Richard BartCylesYamaha royal star venture.XVZ1300TF.And if possible colored wiring diagram.Looks identical to my kids Polaris. The aeon lost spark figure they have same wire harness. Polaris has 5 wire CDI box Aeon has a 4. I thought the mag was bad butCleaned and put back on. Took a test meter and to see if getting a signal from the rectifier and do but can only see meter jump don't know exactly what number itComing out of the box is nothing. Mind u someone sold me an entireI have cdi boxes laying around and the new harness is a 4 wire cdi.We don't want lights or all the bull crap aeon has for wiring. But obviouslyCan a butcherd down harness just for spark work. It's a p.o.s and just wanna get running so the kids can ride. My Polaris with a deadThe aeon had weak spark to begin with. But if u seen the inside of flywheel idk if a coating of crap will stop spark. OhhJust want spark or aeon will be soaked in gas and lit. I only got involved because it's myJust this p.o.s aeon is crap. And personally I hate wiring problems. But apparently this aeon 50cc shit box is my match. My 2 snowmobiles are identical. OneSimple ground wire a mouse I think chewed but. If I could see the exact harness diagram for the aeon thunder colt 50cc. I'd be much appreciated google itThanks in Advance for your kindly support. Greetings Form Germany. Youre sincerely, A. PelAny suggestionsJust trying to wire up battery and circuit breaker and dont know where the wires hookupFrame 1461986, engine 353 Feky 1200286. I am struggling to find any information on this bike online but am very interested inBike is complete but running badly, picture belowThis is a complete body and paint kit for the 1996 1999 Fat Boy.
