## Book Descriptions:

# Dukane 8755G Manual

Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. After reading, store in a safe place for future reference. The meanings of these symbols are described below. This projector requires only a minimal amount of space for installation and can produce a large projected image from even a short distance. These features provide you with the broad use of this projector. Your projector should come with the items shown there. Contact immediately your dealer if anything is missing. Be sure to use the original packing materials when moving the projector. Use special caution for the lens. Do not have a knot in the strap at either end. Let the lens cover with the one end of strap through the loop. Do not cover, block or plug up the vents. Do not place anything that can stick or be sucked to the vents, around the intake vents. Clean the air filter periodically. This projector has some intake vents also on the bottom. Make sure that all the devices are suitable to be connected with this product, and prepare the cables required to connect. Connecting a live device to the projector may generate extremely loud noises or other abnormalities that may result in malfunction or damage to the device and the projector. Ask your dealer about nonaccessory cables which may have to be of a specific length or equipped with a ferrite core. For cables with a ferrite core only at one end, connect the end with the ferrite core to the projector. An incorrect connection may result in malfunction or damage to the device and the projector. Before connecting to a PC, check the signal level, the signal timing, and the resolution. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical. And be sure to tighten the screws on connectors with screws. Then the resolution will go back to the original. It might be recommended to use other CRT or LCD monitors to change the resolution. <http://metabolit-plus.ru/files/file/dayton-manual-motor-starter.xml>

For example, automatic adjustment may not function correctly with some input signals. An input signal of composite sync or sync on G may confuse this projector, so the projector may not display a proper picture. Plug and Play can be used by connecting this projector to a PC that is VESA DDC display data channel compatible. Plug and Play may not work properly if any other type of connection is attempted. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation. It may become too hot. It is intended to be used as supplemental theft prevention measure. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place. Do not use batteries of different types at the same time. Do not mix a new battery with used one. Keep batteries in a dark, cool and dry place. If the leakage adheres to your body or clothes, rinse well with water immediately. This projector has a remote sensor on the front. If the remote MUTE and RESET buttons MAGNIFY OFF and ESC buttons Be sure to check your PC's manuals before connecting this product to the PC. This function is not available while the lamp is warming up the POWER indicator blinks green, and while adjusting the volume and display, correcting for keystone, zooming in on the screen, using the BLANK function, or displaying the menu screen. When the power is completely on, the indicator will stop blinking and light in steady green 60 . The message "Power off" will appear on the screen for about 5 seconds. Then POWER indicator will stop blinking and light in steady orange when the lamp cooling is complete 60 . Attach the lens cover. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings. Please power on the projector prior

to the connected devices. <http://arсланemlak.com/E/dayton-line-voltage-thermostat-manual.xml>

Power off the projector after all of connected devices are powered off. For more information, please see AUTO ON item of OPTION menu 40 .
