If the power cable of the airconditioner is damaged it must be repaired by a workshop approved by the manufacturer, as special tools are required. If this is not possible, lay the appliance on its side and return it to its upright position as soon as you arrive at your destination. A minimum distance of 60 cm from any wall or other objects must be always kept. Make sure that there are no obstacles around the unit affecting the free circulation of air. Wait at least 3 minutes from a previous stop before restarting the compressor. Water tank indicator If the water tank is full you will hear an alarm signal sound and the red light illuminates. After draining the water operate the appliance in ventilation mode for several hours to thoroughly dry it. When operating the appliance in dehumidifying or cooling mode condensate water is being drained into the water tank. If the tank is full an alarm signals sounds and the red light illuminates. Disposal This symbol on the product or its packaging indicates that the appliance cannot be treated as normal domestic trash, but must be handed in at a collection point for recycling electric and electronic appliances. Your contribution to the correct disposal of this product protects the environment and the health of your fellow men. <http://www.petrosteelltd.ru/a/debianedu-manual.xml>

It does not need any form of programming just insert batteries and it is ready to use. RM Series remote control has been designed and assembled from the original remote control. The remote is assembled and checked in the UK. RM Series use the latest remote control technology chipsets to ensure the infrared codes match that exactly of the

original remote control. IMPORTANT Unlike other generic replacement remotes the RM Series buttons are all 100% LABELLED correctly. <http://scro.ru/pic/debitek-cash-to-card-manual.xml>

Other generic replacements often have a standard button layout to save costs, with incorrectly labelled buttons and therefore needs instructions to tell what each button function is. This can lead to confusion and constantly referring back to the manual can be highly inconvenient for the end user. RM Series buttons do exactly what they are labelled to do so no need to constantly refer to manuals and instruction sheets. The RM Series range of remote controls has been a popular choice of the professional TV servicing industry across Europe for over a decade. Unlike more generic replacements, each individual RM Series remote control is customdesigned to operate EVERY function of the original remote that they replace. The case style itself has been designed for sturdiness and reliability, whilst the buttons and text are optimised for visibility and ease of use. To meet the demands of the servicing industry, the materials and components used within the remote are carefully specified to produce a thoroughly reliable product and undertake vigorous testing to ensure long term use. All RM Series are CE and ROHS compliant. Page 1 of 1 Start over Page 1 of 1 In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyses reviews to verify trustworthiness. Please try again later. Neil Dennis Price 4.0 out of 5 stars The power button on the remote turns the AirCon on and off and the volume buttons control the devices temperature. As the original AirCons remote was so small it was lost ages ago and a heat wave made me look for a replacement. This one was cheap and got the job done. I easily recommend it as a replacement remote. Previous two are junk.

Duracraft as a manufacturer was not on the list of codes for the remotes. This remote was 100% straight out the pack. Best Wishes RM.
