IT plays audio CDs as well, for those who do not have a CD player.

I am most impressed with its slim design and silent operation and of course, I love the remote for the times you just have to pause or rewind! Worthy of note if you have a surround sound or other audio enhancement there are easy to set options for the type of speaker layout and sound style you are looking for. Panasonic products have always been a known as quality, but I have to say that this DVD Player is a gem! I wasn't expecting it not to be able to play any of the discs I recorded myself. Its only good for watching movie DVDs you have purchased or rented. That makes it practically useless to me. Consequently, its just collecting dust in my basement. All Rights Reserved. Please note, however, that MP3 playback may vary depending on the content and disc type used. For your viewing convenience, Panasonics highspeed scan comes with five speeds, and the player also offers chapter preview, updated onscreen menu icons, a frontpanel jogshuttle dial, and a multibrand remote control. Panasonic DVDRV31K comes in black and is Energy Star compliant. This model is covered by a warranty for a year on parts, 90 days on labor.To calculate the overall star rating and

percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Dr KrwL 2.

0 out of 5 stars Well the good news, is I came to amazon.com to print my invoice and check the warranty on this POS. When I started reading the ratings, I decided to take the cover off. Procedure Took off the cover and gently spun the mechanism. Plugged in; NOTHING. Spun the mechanism while plugged in; NOTHING. I had to go to 2 stars though because I have gotten about 5k hours out of this player. With four kids, who refuse to turn the thing off when they leave 5 minutes into the movie, it has done some serious work for my family. Good luck, Dr. Kevlar! I got the RV31K because it will play CDRs, CDRWs and discs encoded with MP3 files which the A120 would not. I have rated this player only 3 stars for a couple reasons. First of all, even tho it will play MP3 encoded discs, I have found that it will not play all the tracks on some discs. Im not sure why except that I heard that if the MP3 file isnt encoded at a 128K bit rate it wont play it. Not sure if this is true but I do know I have a disc with over 100 tracks and the RV31K only recognized 25 of them. The second reason I only rate the RV31K with 3 stars is that the build quality is very flimsy. The drive itself is also relatively noisy when loading and unloading discs compared to the A120 and other players Ive looked at. The A120 was completely quiet. To its credit the player has several nice features and Panasonic improved the size and layout of the buttons on the remote compared to the tiny buttons that were on the A120s remote. And Ive not had any problems with the player thus far other than the MP3 problem, having owned it for about 5 months. I just wish Panasonic had not cut back on the build quality as much as they did. But Ill probably hang onto it till affordable DVD recorders become available in the next couple years. I had forgotten wed bought this from amazon. We got it in 2001 and its still here, having survived 3 moves and hundreds of hours of usage.

The picture quality is good, handles scratched netflix DVDs like a charm, and has never had any errors. It is also able to handle VCDs which our newest DVD player for the basement can not. Seems there was a lack of quality control based on the variety of reviews. Otherwise, its been great for the little money I paid for it. Since its three years old, Ill be looking for a replacement that has the Zoom feature and can read MP3 tracks with all the encoded track information. Last night while my daughter and I were watching Harry Potter it stopped and despite every effort to start it all I could get was an error code H02. I called Panasonic and they told me the warrantee was for 90 days labor and 1 year parts and that I would have to send the unit in to get serviced at my own cost. Buyer beware. This is an unreliable machine. It may seem a good buy but for me it was just wasted money. Look for a better quality product. This is shoddy. The Panasonic is everything I wanted and although I am sure there are bigger and more complex devices on the market, for normal athome viewing without hassles or headaches, this more than meets the bill. I gave it only four stars because I have no real basis of comparison but for me it is a five star winner. I am delighted with it and commend it to anyone who wants a dependable DVD player at a bargain price. Something went wrong. View cart for details. Please try again.
