Here you can see many Chinese symbols of different colors, including green, blue, yellow, red. But be prepared that there are no scatters and wilds in fafafa real casino slot. It is the symbols that make fafa slots so simple. To get a winning combination, you need 3 identical symbols that match each other. All symbols have different values, depending on their color.

The graphic design is sophisticated, and the visual effects are developed in an accurate way. It's a pleasure to watch how the reels are spinning. Despite the simplicity of the FaFaFa casino slot, the symbols look brilliantly and rich in notes. The pre-dominant deep-red colour epitomizes friendly hues in Chinese culture, and the golden elements symbolize the richness of the culture. The overall impression of the graphic is positive.

Unfortunately, it is impossible to win a jackpot at the FaFaFa casino game because it is unavailable. The game has a lack of features, and you cannot even find free spins or something like this. The only thing that can help you get your reward is a successful line-up of symbols.

The video slot is designed in a typical manner for Chinese culture, focusing on deep-red and gold shades. The design makes an impression that players are involved in a dangerous world, where they have a shot at changing life and becoming wealthy. The playground grid, which is filled with one Chinese hieroglyph in different colours, is unusual and consists of one line and three reels only.

But will you be successful in the Far East? Here's a review of Fa Fa Fa by Spade Gaming with everything you need to know.

There's only one design of symbol on the reels, but it's not that simple to get a match! There are three different colours and to get the best prizes you'll need to match the same colours together. There's 1 central payline, too, and the symbols don't always land through the middle. For such a small game it can be surprisingly tricky to land a win!

The three available play levels in free Fafafa slot machine can simultaneously attract professionals and new players.

The game obtains three levels of the multiplier (Level 1, Level 2, Level 3). Each level multiplies the sum of the bet by 1, 2, or 3, respectively. Following this multiplication process, the total bet will be formed. For example, your bet is €50, and you pick Level 2. So, the total bet will be €100. Absolutely, you can use FaFaFa slots free coins to try the game in a demo mode without investing any real money.

During the gameplay, you can reach the highest payout, which is €180,000.00. It's not a jackpot, but it's huge money even though the video slot doesn't have any bonus features. The proper way to get this sum is to have three Red Fa Symbols, which create FaFaFa in one line. Bear in mind you have to play like a high-roller by placing the maximal bet of €450.

First of all, I love to buy coins for these types of apps cause it relaxes me to play them. However, this app in particular is the stingiest of them all. No big wins and very seldom bonus games. I will not spend my money on an app that can't even give you one bonus game. The bonuses are what keeps the game interesting. \$53,000,000 coins spent the other day and not one bonus game was given and I was only able to play about 10 minutes then it was all gone. This is very upsetting and I'm really contemplating uninstalling... These machines are tighter than the real machines in the casinos. Today I was playing the PANDA game and "supposedly" won \$28,000,000 and all I had in credits was \$19,000,000. Mind you I had about \$5,000,000 left so only about \$14,000,000 was paid out from "\$28,000,000." This game is a fraud! Every spin will swallow your credits and not payout.

The match of three Red Fa's is the most valuable and beneficial in this game, and it can bring you generous fruits. Indeed, the red and blue ones are less profitable, but they are also advantageous in some way. By having the full match of blue hieroglyphs guarantees to multiply your total bet by 150 times.

The level of volatility is in the middle position. That means that you will have quite nice odds to get the desired match. This medium volatility fits well for both newbies and experienced gamblers.

Spade Gaming's library includes a number of games with complex graphics but that's not the case with Fa Fa Fa. But that doesn't mean this video slot is any less striking, offering instead a simplified yet sophisticated appearance.

If you are getting bored from super stunning and mega innovative video slots, this simple gambling solution will perfectly fit your needs and desires. The game's essential motto is "The timeless classic that doesn't stop rewarding you." So, you can consider this phrase as the one which will lead you to great prizes.

As mentioned above, the system is simple yet effective and it's easy to tell at a glance what you've landed because of the distinctive colours.

Great games, exciting and fun. Graphics are amazing and the diversity speaks for itself. Each game is such a surprise as to all the extras just like in the casino. They have definitely done their homework and put in a lot of time and effort. Unfortunately, I have one complaint. I was trying to purchase chip package recently payment on card I was using didn't have enough on it and once I put more money on card it took amount off card and never game me my chips, couldn't contact seller. Hopeful that they will see this and make it right rather than going through iTunes for help.

Fafafa slot games are also famous for their real animation, details, and sounds. They are everywhere, so you can fully feel this atmosphere of authentic style.

The yellow and red symbols take top spot, winning you between 100 and 400 for matching three on the payline, depending on your level of bet. The blue-toned symbol is next with a payout of 50 and 150 with the green symbols offering 25 to 75. If you land a mix of three different symbols on the payline – which is much harder than it sounds! – you'll grab between 5 and 15.

As it was mentioned above, FaFaFa features three reels and one line for a payout. It leads players to old-school gambling, focusing on the one line only. But before you do that, it's necessary to place a stake. The system of placing bets is uncomplicated. A player needs to select a stake, which varies from €0.20 to €450. The value of the total bet depends on several factors:

The app does NOT reflect real life casino slot play (a real life casino would lose its license if it failed to issue credits due to the player). Read on for my experience... Was happy to see the game selections. Received about 10million credits on the download, played minimum or close to minimum bet (between 60K & 200K per spin) which was gone within fifteen minutes. I usually wait a few weeks to spend money in app to see if the app is worth the investment. Thankfully I have not spent money in app. My experience is based on the daily spin, hourly bonus and "level up" bonus. On more than one occasion I have NOT been credited daily credits after spinning the wheel (not an oversight on my part as my balance remained close to zero, restarted several times, tried to problem solve, etc). Since the daily wheel problems, I have notices on at least five occasions my balance did not reflect the ~250K credits for "leveling up". I think my only bonus rounds have been in the game "heaven and earth" on minimum bet. Am unable to sign out of my Facebook acct within the app (come on developers, every other similar app allows me to do this). I doubled checked=I have not missed an update. Poorly developed app on which I will NOT be spending money.

As mentioned above, Fa Fa Fa is played with just 1 central payline which is fixed. However you can alter the value of the coin and also decide how many to play with per line. The minimum value is 0.10 and the maximum is 20.00 and you can between between one and three coins on the payline. The payable has three columns and this shows what your prize will be depending on whether you bet one, two or three coins on the line.

According to the information on the developer's official website, an RTP index of the video slot consists of 95.05%. It's a pretty good indicator because it follows the average standards of the market.

The main feature of the video slot is its simplicity. Therefore, Spadegaming took the decision that they would leave the only symbol in the game – the hieroglyph. The name of the game is FaFaFa, and three hieroglyphs in one row mean FaFaFa. In order to make a little difference while having different winning combinations, these symbols differentiate in colours:

Spadegaming focused on simplicity and one winning line for a payout. Thus, you won't find out bonus rounds, free spins, or other types of bonuses at the FaFaFa video slot. Everything is straightforward and uncomplicated – have a match of three hieroglyphs and take your winnings. And you have a real shot at getting an insane money prize.

In case you want to get to know the rules of the game or turn off the soundtrack, you can do it on the same panel. The software developer put a Paytable above the playground grid. So, everything is on board, and nothing is hidden.
