Sometimes producers of video slots do not know which theme to choose, so they return to popular subjects and present them in a new style. The theme of Asian countries has always been popular in virtual gambling, so we can find dozens of such video slots. But this emulator niche is updated regularly. In the spring of 2018, Habanero Studio released a new slot called Fortune Dogs. This Asian gaming machine will tell users about funny dogs that organized the attack mafia. Such an unusual story was complemented by amazing gaming performance and bonuses.

The style of this model is fully consistent with its original storyline. So, the main background describes the attack town. By the way, the main location of the game will change from time to time. For example, at night you will have fun in a big and bright metropolis. This is an interesting option, but unfortunately, it is not used in all modern slots. Above the playing field you can see a large logo and 4 Jackpot cells (Mini / Minor / Major / Grand). The transparent playing field is surrounded by a wooden frame. In addition, the Fortune Dogs slot is equipped with 3D characters and animations. For example, symbols will explode when combinations appear. Sound effects underline the atmosphere of Fortune Dogs.

The bottom of the screen is for the control panel. Thanks to these buttons you can control 5 reels and 243 pay lines. The “i” button opens the door to the theoretical information section. Here you will find several pages that describe all the characters and their capabilities. Since all lines are fixed, gamers only need to bet using the Coin / Bet Level keys and their “+/-” controls. The largest bet is activated by the Bet Max option. The SPIN button will allow you to start the game. If the user wants to use the automatic mode, then he / she needs to activate the Auto Play option. Several buttons allow you to adjust all aspects of the gameplay.

After that, you need to catch several identical pictures and get paid. All characters fully reflect the plot of the video slot. So, you will find Thai noodles in a box, golden coins and funny characters.

Wild (food) replaces all characters that do not perform special functions. Gamers will also meet a gold paw (Scatter) and a pot of coins (Bonus). All these pictures perform different functions, which are described in detail in the theoretical section. In addition, funny dog porters can activate another bonus option.

Overall, we can say that the Fortune Dogs video slot offers many bonus options. You can replace the usual pictures and take part in Free Games and mini-games. Players will win one of 4 jackpots, after all!

There are several casinos online dwelling upon dogs' universe but this one is way more unique and exciting to play. Fortune Dogs has a mixture of two themes, which includes that of the cute dogs spiced with some Asian culture and effects. Looking at what Habanero did with this slot from another angle, it looks like a detective game, with bulldogs and Kungfu masters working hand in hand to save the day.

Like we said earlier on, this slot has a combination of topics, this is also shown in the presentation of the symbols on the reels. The least paying icons are the card suits which include heart, spade, diamond, etc. The high paying ones are the dogs themselves, each one has a super ability of its own. Some can clone themselves into two, some into three thereby creating a form of a multiplier for each win they contribute to.

The scatter symbol should be looked for as it can open you to chances of hitting huge jackpots. It gives random free spins once at least 3 of a kind appear on a screen. This can also be retriggered if more scatters appear.

The gameplay here is not so different from what you will see on any ordinary casino. The unique effects, however, are the Chinese tunes that accompany its gameplay.

You will have to get yourself used to some command buttons, these include the max bet, spin, and the autoplay. Where the autoplay sets the game running for as long as you like with your regular stake, the spin makes it go round, and the max bet plays with the highest wager possible with the highest coin value of 18.

If you want to play online slots for real money but without a deposit, there are some free slots for real money at online slot casinos. This means that you play free online slots with your free cash money no deposit bonus casino money from an online casino site. Most online slot games are available with free money welcome bonus, but in order to play real money games, you need to find one of the casinos whose welcome bonus includes a free bonus or free spins bonus.

These welcome bonuses don't come without any strings attached. Every real money online casino bonus has at least 1x wagering requirement, meaning that you need to play slots at least the same amount than you deposited. For example, if a free slots site has a \$25 no deposit bonus with a 5x wagering requirement, you would need to wager \$75 playing slots before you could withdraw your cash from this online casino.

Welcome bonuses or first deposit match bonuses are offered by almost every reputable online casino. If you want to play slot machines that pay real money, you might want to take advantage of these bonuses from legal gambling sites. Online slot casino sites like Caesars Casino will match your first deposit up to \$2,000. With a 15x wagering requirement, this gives you a much higher chance of winning big than the free games you can play with your no deposit bonus, as big wins on real money slot machines often take several spins.

One thing is for certain, the best way to make most out of your money is to play slots with high RTP. Let's say that you take the \$2,000 welcome bonus from Caesars. Excluding progressive jackpots, the best slot machines for you to win real money are Blood Suckers slots with it's 98% RTP, making them the right choice for wagering through your casino bonuses. After claiming your \$2,000 welcome bonus with a matching deposit, your total balance is at \$4,000. Because the wagering requirements for the welcome bonus are 15x, you need to wager $15 \times \$2,000 = \$30,000$. With 98%, you will lose \$2 on average for every \$100 wagered. Let's do the math then. To wager through \$30,000 you need to wager \$100 three hundred times. On average, you will then lose $300 \times \$2 = \600 . This leaves you with \$3,400 meaning that your net positive is \$1,400 and you can now withdraw \$3,400 in real money.

We only recommend and review online casinos that have been licensed by a legal US state authority like the NJDGE (The New Jersey Division of Gaming Enforcement). Unlike many other sites, we don't list casinos like Red Dog Casino, Slots Empire, or Wild Casino, which operate under the Malta license. If you play real money slots at these sites, your money is not safe and there are no guarantees that you can withdraw your winnings.

It depends, there are multiple online casinos to choose from. However the best option, if we are looking at the number of slots and a generous welcome bonus, the best online slot sites are either BetMGM (\$1,025 bonus value & 700+ slots) or Golden Nugget (\$1,040 bonus value & 800+ slots). Both of these online casinos have a great selection of high return slots from all major software developers and feature all the main types of games including live dealer games, video poker, online sports betting, table games etc., in addition to slots.
