Catching a bonus on a slot machine is always a stroke of luck. In our opinion, it is possible to win really big only during the bonus game. Moreover, it is absolutely unimportant what kind of plan the slot machine has as a bonus. It can be compared to a lottery ticket with a higher price and higher odds. If the spins of the reels in the normal mode are ordinary tickets, then when the bonus drops out, the heart begins to beat faster, because these are tickets of a different value. Here is a chance to win back losses and jump out with a win. Agree that, playing to the maximum, catching a few free games multiplied by 3 is already a success.
