Gambling is a very popular. Besides the perspective to earn money, it is a hobby that provides adrenaline shots to millions around the world.

However the outcome depends, in many cases, on pure luck. One notable exception being poker (although chance is still involved). What if you could wage money on yourself on video games. This possibility is available thanks to nascent platforms that are introducing skills-based betting. Or gamebling, if you wish!

You can bet on yourself VS another player. Play an AAA title such as CS:GO and bet that you will kill X opponents, or a minigame or indie game and take a similar wager. For the casual gamer it makes matches vs friends even more interesting. The pros can really secure an income with skill-based betting.

Browse our platform reviews to find the best places to play games and make real money. Are you looking for casual games? To wager on the most popular titles? Board or card games? We cover all the platforms that allow you to play and earn, such as SkillGaming, Sitago, Wealth Words, G-Loot, Swagbucks, GetPaidTo Games, etc.

You don't even need to buy the latest PlayStation or Nintendo or Xbox to get started on this. Forget getting those gaming consoles 'cause all you need is your trusty computer and reliable internet connection.

So if you love playing games, this is the perfect opportunity for you to earn extra bucks.

In this post, we will talk about this money-making gig. We will look into the places where you can score these projects. Let's also look at why it's a good idea to get started on this; aside from the obvious motivation, which is money.

Game online play money

For our parents and their parents and grandparents, that may seem like the craziest idea. I mean, if you told me 25 years ago that I can play games for money, I'd say that's farfetched.

Playing games is certainly highly addictive. It's a fun pastime. Unfortunately, it eats up most of your time. As a result, you may be unproductive in your day.

But here's a way to take advantage of it all. And that's through playing games.

For gamers (and wannabe gamers like myself) out there who are looking to score a few bucks, this is a great opportunity to earn money.

No, you don't have to dedicate a number of hours each day for this one. And certainly, you don't have to quit your day job.

You can do this while you're trying to pass the time. Whether you're waiting for someone or while you're on your break at the office.

Game online play money

In fact, you could be waiting in line or sitting for an appointment. You can play games for money. Talk about fattening your wallet while you're idle.

Now, I'm not saying you'll earn a thousand bucks each week, playing games for cash. But you get a good earning potential here.

If you enjoy playing video games, you might as well give this a try. It can be worth your time.

It was in 1976 when Atari released Breakout. Safe to say, it was one of the first video games, if not the first, that made it into the mainstream.

It's amazing how far video games have come a long way since then.

From team sports to shooting zombies, these video games truly evolved. And people are spending time and money on these games.

This is why there is a compelling need for video game developers to create different evolutions of their games.

But these evolutions didn't just come about. The developers put in much effort and research to arrive at their latest games.

A lot of game developers are looking to test their games to a certain segment of the gamer population. Perhaps they are looking for more insights on how to improve gameplay and what-not.

Did you know the gaming business is a multi-billion dollar industry?

It may just look like it's all fun and games. But guess what, the gaming industry rakes in hundreds of billions of dollars in revenue every year. And each year, more people are happy to spend on their favorite video games. So the industry is growing and doesn't look like it's about to halt in its production of new games.

Game online play money

Case in point: close to 73 percent of people between the ages of four and 20 play a video game. Whether it's on their favorite game console or smartphone or online gaming websites.

This percentage continues to grow every year, soaring significantly in the last 10 years.

So with this kind of explosion, it's no surprise why most game developers are looking to boost their research. Whether it's coming up with new games or evolving their existing ones.
