Developing for the land-based, online, social, and mobile markets, High 5 Games has created hundreds of games that are played on six continents and in more than 150 countries. Founded in 1995, H5G is responsible for many of the casino industry's most successful video-reel slot machine games. The company's social product High 5 Casino is one of the best-performing casinos on Facebook, with more than 1 million active players.

With many of the most recognizable brands in the industry and gameplay that makes it feel like a player is in a real casino, High 5 Casino has quickly become one of best-performing games on Facebook. In fact, its sticky rate – which is the best indicator of engagement because it measures DAU over MAU – is an impressive 34%. That engagement level outperforms virtually all other social casinos on Facebook. This has been done without any social engagement methods that other casinos use to amplify growth.

“We are delighted to see that so many players have installed and enjoyed our social casino in such a short amount of time,” said Anthony Singer, CEO of High 5 Games. “It has become clear to us that online players are searching for the same high-quality slot games that they can find in real casinos. It just made sense to launch our top brands online in conjunction with their debut in brick-and-mortar casinos. High 5 Casino has become that exclusive social destination for players looking for real casino games on Facebook.”

Dragon Tiger is a 2-card version of baccarat, hosted by highly trained dealers that bring the real casino experience on to the user's device. Two cards are drawn by the dealer and players must bet on which card will be higher, the Dragon or the Tiger. Broadcast from a state-of-the-art studio, this east-Asian themed room is a fantastic choice for casual card players.

The company's recent social product, High 5 Casino, has received wide praise throughout the industry. At Casual Connect in October, Playsino CEO Brock Pierce highlighted High 5 Casino's rapid rise, saying the bar had risen for social slot games and that High 5 Casino had “the best metrics of anyone I've seen in the space.” He credited the application's ability to create an authentic gaming experience without all of the cumbersome pop-ups that had become routine in Facebook games.

“We know that the future of casino gaming must include social, mobile, and online consideration,” said Med Nadooshan, COO of High 5 Games. “We decided to bring a few of our more mature brands to a couple existing social casinos, but we have kept the exclusive rights to our newest and most promising content. Our social and mobile platforms serve as a powerful marketing tool for increased traffic for our partners and the casinos that carry H5G games.”
