GoWild Casino has been added to our blacklist because of predatory terms and conditions that have been revealed. The casino makes it hard to win without violating these arbitrary terms, which give the casino complete freedom to determine bonus abuse, fraudulent activity, and more. Furthermore, GoWild also has rules that discourage you from changing wager amounts. Because of this, we have blacklisted GoWild and urge players to bet at reputable gaming sites.

The Club World group (also known as Affiliate Edge) used to put out high-quality casinos that serviced the American market. Unfortunately, things changed in 2016 when the company's ownership ousted the management that oversaw the successful operation. Things then got worse when the company sought out assistance in running the casinos through the AffPower affiliate group, a known bunch of scammers that have run other brands into the ground.

Coincidentally, at the same time, The Pogg was investigating a very similar complaint from another winner who had 24,000 Euros mysteriously disappear. The casino sent a denial to the Pogg, and ignored follow-up efforts. The Pogg was basically put in a "he said - she said" situation. However, he uncovered the fact that the gaming license from Curacao was revoked on May 13, which made blacklisting much easier.

High roller casino bonuses will always be sought after by wealthy players and other players who can afford it once in a while. But the chances of winning are the same as in games where the player is offered low deposit bonuses.

Internet casinos typically pay advertisers according to how many players they deliver or how much those players lose. It is not unusual for untrustworthy casinos to short-pay their affiliates, either by changing the commission formula retroactively in their own favor, or simply to stop paying without explanation. Either way, a casino that can not be trusted to pay their advertising debts also cannot be trusted to pay winning players, in my opinion.

Interesting fact: Uranus is the seventh planet in the solar system. Well, Planet 7 Casino certainly puts the word "anus" to correct use with their tactics. The casino has a terrible reputation for their payout speeds and management, having left several players in the lurch after trying to claim their legitimate winnings. Because of this, we have made the decision to warn players to avoid playing at this site, as it's likely that you're going to see your winnings either severely delayed or outright denied.

Live roulette online casinos ireland

After getting some anecdotal evidence that Netgaming.com was cheating in free play mode I gave them a try. In their single zero roulette game, I placed 200 bets on red. My results were 133 wins and 67 losses. The probability of 133 or more wins in 200 spins is 1 in 3,788,515. So obviously they were letting me win. I blame the software for this and thus add all Elka/Oyster Gaming casinos to my blacklist. Besides this reason, they have had a terrible reputation in the industry for years. Furthermore one of their clients, NetGaming, sold me out to pornography spammers. I used to maintain a list of Elka/Oyster casinos here but checking a random sampling of about ten 100% had vanished. So I believe this group to be fortunately defunct.

Casino Royal Club has fallen on our bad side for many of the same reasons other casinos are on our blacklist: they are slow to pay players, flat out deny legitimate winnings to players, and have poor service. There are many other online casinos that are reputable, and we highly urge you to visit these casinos rather than Casino Royal Club.

Online casino bonuses are of two kinds: Cashable high roller bonuses and "Sticky" high roller bonuses. Cashable high roller bonuses are awarded to high rollers who pass the wagering requirements set forth by the casino. "Sticky" high roller bonuses are bonuses that can be used to bet on a game and a player can keep any of the winnings he gets from using this type of bonus. But he is not allowed to keep the bonus.

BitBingo is an online betting site that specializes in bingo but also has a full casino attached to it. Last month a player complained that the site was not paying out on a cashback bonus, and since that time it appears that the site has gone dark. Any messages sent to the casino, its representatives, and the support team have not been deliverable, leading us to believe this portion of the casino is down. This is unacceptable, as the site has not

given any heads up to outside sources, leading us to put them on our blacklist.

These two sportsbooks claim a group of players were all following the same radio handicapper in Connecticut, and such "syndicate" play is against the rules. In my opinion, this is a ridiculous reason for non-payment. Some handicappers have huge followings, who all bet the same way when the picks are released. Take your losses like a man and pay, for crying out loud!

Paysafe's products are not limited to the iGaming sector. It is the parent firm of Skrill, Neteller, Income Access, and Paysafecard. It has a long history of working with gambling operators. Since the Supreme Court struck down PASPA in 2018, the firm has its eyes set on the US markets. It will be able to strengthen its presence in America via a couple of dozen states that are legalizing sports betting.

Upon first glances, it may strike you as odd that Cosmik, EuroMoon, Atlantic Casino Club, Osiris, and Deuce Club casinos have all been added to our blacklist, as they all appear to be legitimate casinos offering big-name games from some of the world's top developers. Unfortunately, an investigation by our sister site Latest Casino Bonuses revealed that the group is using pirated Net Ent games, which victimizes not only players, but the company who spent time and resources creating the games as well.

Vegas Amped Casino has proven to be extremely untrustworthy, as it has gone back on paying customer accounts for legitimate winnings, and those that do get paid often have complained of very slow payout times. Because of this, we have blacklisted Vegas Amped Casino from our site, and we recommend that you look elsewhere if you want to play.

Founded years ago, El Dorado Palace has taken several steps to hide the specifics regarding its operations. This is proven through having a domain based out of the Philippines, servers in Panama, and software out of Russia. This, combined with a lack of cooperation from casino management on the details of the company leads us to believe that El Dorado Palace's management is trying to hide something and is thus untrustworthy.

Roadhouse Reels Casino is one of a series of sites that have been forced to shift its software to match regulatory concerns, and as a result, they have shafted both players and affiliates. The group previously used Microgaming software, but has since moved on to Saucify, which is a major step down in quality. This comedown has also impacted their ability to issue payouts effectively, as there are reports of players having to jump through many hoops to get their money.

Mona Casino is an online casino that has a history of making players wait a very long time to pay out winnings, with some players complaining of times exceeding 90 days. In addition to this, Mona Casino also has direct links on its site that may contain malware and viruses, making even visiting the site a risky proposition. Because of this we have made the decision to blacklist Mona Casino, and strongly urge players to avoid even visiting the site, let alone play there.

Start Your Own Casino software by their own admission can guarantee the operator a specified minimum win. As stated on their web site, "Our proprietary random number generator is calculating your profit before the winning/losing number is sent back to the game. You can set a minimum profit that is always kept for you! This also ensures that you will not wake up with \$20000 debts!" Thus the games cannot be completely fair and random. I used to list three casinos using this software, but all three links are dead, as of July, 2009.

I wrote to Moore Games three times to ask for their version of both disputes. The first two attempts were ignored and the third, sent on May 20, 2013, bounced back. I also note that the Moore Games web site went down on that same date. So, maybe this warning may be too late, but if Moore Games still exists, I recommend you stay away, and current players withdraw your funds, if you still can.

Making things worse, AffPower was informed of the issue and went so far as to register a domain that could be mistaken with Net Ent's legitimate host, furthering their involvement in the deception. Because of this we have blacklisted all AffPower casinos and urge players to avoid playing at any of the above mentioned sites as the games could be rigged.

Ladbrokes Casino is a licensed online casino and is one of the few virtual casinos that have registered with the Internet Control and Rating Agency (ICRA) which helps to monitor and prevent underage gambling. This casino restricts players from Germany, Italy, and the USA and allows players from the Netherlands to only place bets on horse racing, greyhound racing, casino and poker bets offered by the casino. It is one of the best casinos on the internet. If a player deposits £7500 or more every month, he gets to enjoy the VIP benefits offered such as having access to the Silverstone Grand Prix, Royal Ascot, and FA Cup Final and being able to wager £10k on Baccarat, or £10k on a Blackjack hand and up to £500 per number on a Roulette game.

VegasCasino.io has been found to be offering pirated games to their customers. Needless to say, this is a major no-no, as it means that the math for the games can be altered to make them unfair. It's also stealing from legitimate game developers, who put in time and money into developing quality games. We had some major doubts about VegasCasino because of their lack of a gaming license, and unfortunately, it looks like those concerns were founded. We urge all players to avoid playing at this bogus online casino.
