It's a debate as old as the very first online casino: should you play online slots for free or bet for real money? The only valid answer is that there is no better or worse – there are just different advantages.

At VegasSlotsOnline, we love to play casino slot games both ways. The two complement each other, and even if you're a real money player, sometimes you should consider playing free online slots.

On slots line

First of all, playing online free slots will make you see if the game's marketing was simply hype or if you really enjoy the game's software. It's also a great way to test out the selection of games at a new online casino, and make sure the game lobby is to your liking. As you're playing any free online slot, ask yourself a few questions, such as: How often does this game payout? Does it offer a good betting range? Does it have an interesting theme? Does it have enough bonus rounds for my liking?

Having your own checklist, tailored to your preferences, will ensure that you won't waste money on slot machines you don't really like to play.

Playing free casino slots is the perfect way to unwind, relax, and simply enjoy your favourite free slots games online as entertainment – without getting caught up in chasing wins.

Free slot games are the most played online casino games in Canada, way bigger than blackjack, roulette, or any other online casino game out there. That also means there are more of them – thousands, in fact. Can you imagine playing thousands of slot machines for real money to discover which one you liked? Of course not, that's the beauty of free online casino slots: you can take each slot machine on a trial run without worrying.

Line on slots

Playing free slots for fun gives you a better feel for that particular online slot machine. Even though slots are a game of chance with random outcomes, they have different ways to win, different bonus games, varying numbers of symbols, and different jackpots.

Once you play free slot games online, you'll get a feel for your favourite machines and how often they'll pay out. You'll also notice which slots feel like they pay out more often. Some pay out small jackpots regularly, while other slots pay out larger amounts occasionally. You'll get to know which you enjoy seeing: the big wins, or small wins regularly.

Line on slots

Beyond finding the online slot machines you enjoy playing and getting a taste of new slots sites, there is no real winning strategy to them. Slots are games of pure chance, and nothing we can do can influence the outcome of each spin of the reels.

Don't pay too much attention to the Return to Player (RTP) numbers that online casinos highlight. Those figures are based on millions of spins. Just because the slot machine you choose says it has a 95% RTP, it doesn't mean you'll get back \$95 for every \$100 you spend.

On slots line

RTP also applies to free casino slots games. You'll get a feel for how often a particular free slot pays out as you play. That's probably your best indication of a free slot's payout rate. The good news is that it won't cost you a cent to find out.

Though, there are some slots features that you should be a bit more mindful of when hunting for your next new online slot. Above all else, understand how reels and paylines work, and how they will affect the kinds of bets you can make. The more paylines you bet on, the more you can win – but of course hitting the right combination is harder.

On line slots

You should also look into the individual features that all slots games have. These features seriously affect how much you could win. Such features include wild symbols, that replace other symbols to hit winning combinations, scatter symbols, that activate free spins and bonus rounds, and multipliers, that will multiply your winnings.

There is absolutely no charge to play these free slots. The only drawback to free casino slots is that you cannot win any real money by playing them online.
