If you see a slot specifically labelled as a 'jackpot slot', it means there's at least one progressive jackpot on the line. Progressive jackpots are an increasingly popular feature of slots games, not to mention casino games more broadly, providing players with the chance to win a truly life changing amount of money - all on a single spin.

## **Casinos online jackpot smashcasinos slots**

Yet even amongst online slots, there is a class of game that stands head and shoulders above them all - the jackpot slot. Not to be confused with the jackpots available in every slots game, jackpot slots are games in which there is a 'progressive jackpot' up for grabs. But what does this mean, and how does this impact the gameplay on any given slots game?

In theory, if you look at the RTP slots should provide you with the best chance. Because the game plays out on its own it largely doesn't require any skill or experience to increase your chances of winning. Every spin is independent of another one, but with casino games the player can make

mistakes or not play the odds as perfectly as a seasoned player and this will also swing the advantage further towards the casino. Ultimately though gambling has to be fun and always within limits, only bet what you can afford to lose and play what gives you the most enjoyment. For us at SmashCasinos that is probably Crazy Time.

When it comes to progressive, or jackpot slots, they don't come any more well known than Mega Moolah. One of the best known slots of all time, it holds the current record for the highest payout in history - in the region of £13 million, for a single spin. The game offers players the chance to scoop one of the four jackpots on offer, ranging up to the truly life-changing sums of money on offer.

The game itself is made up of five reels in a 3 high formation – a format considered to be the standard for modern video slots. On the reels you'll see symbols like golden harps, lucky horseshoes, and pints of Irish stout. It's all set in a lush green meadow that instantly gives the game away – this is a slot that is Irish-themed from top to bottom.

Trying a release at no cost brings one key advantage for players. Playing free slots gives you the option to experience everything that a particular casino game offers. Reading a description is often not enough with increasingly complex and plentiful features. Casino members can experience the bonuses themselves and decide to play that slot for real money.

It should come as no surprise to anyone that 7 Monkeys by Pragmatic Play is a somewhat monkey intensive slot. A by intensive, we mean intense. These monkeys look like the stuff of nightmares, though if you happen to land it lucky and scoop a jackpot, we doubt you'll be complaining very much.

Some jackpot slots games even go as far as to have multiple different progressive jackpots in play at the same time, giving you more chances to win. These tend to range in value, and naturally the smaller pots are easier to win - but whatever jackpot you scoop, playing jackpot slots of this kind can be one way to give your slots winnings a welcome boost.

Il suffit de créditer une machine à sous d'un montant (que vous pouvez bien sûr vous permettre d'investir dans ce divertissement). Cette somme sera convertie en nombre de pièces. Si par exemple vous avez mis 200€ dans un bandit manchot et que vous choisissez des pièces à 0,5€, cela vous donnera donc 400 pièces disponibles. Les gains sont proportionnels aux valeurs des pièces choisies. Il faut donc déterminer cette valeur, que vous pouvez faire varier au cours du jeu (pour faire des stratégies notamment).

With regular slots, a single spin win can be worth a decent amount. But if you're going to build up a more sizeable prize fund, you'll want to land multiple big wins, time after time, to build your bankroll. With jackpot slots, one lucky spin is all you need to completely change your fortunes overnight. It only takes one spin to land a jackpot, so it might as well be a progressive one. While the chances of landing a progressive on any single spin are small, players can and do win millions, and many slots fans see that as a worthwhile trade-off for the chance to scoop such a huge jackpot prize. When you consider that some slots also offer multiple different progressive jackpots at the same time, this becomes an even more tantalising prospect. One spin is all you need.

While it doesn't payout every day, when Mega Fortune drops, it does it in style, making players instantly rich beyond belief, just for landing a progressive jackpot prize.

Especially in slots where the jackpot is awarded based on lining up jackpot symbols, seeing these appearing on your reels sets pulses racing. Players can bet from just £0.20 per spin, great for those planning a longer spin session within a restricted budget. At the opposite end of the scale, you can spin right up to £400.00 a whirl, which will allow you to take full advantage of the maximum potential of this game. The base game jackpot is 1000x, which alone would be enough to make this a tantalising prospect - but when you factor in the huge progressive jackpot, it's clear there's even more going on here that make this worth a few spins.

Players enjoy these games for the graphics, the gameplay features such as Megaways and exciting bonus rounds. But arguably the main appeal comes from the fact that these games pay out big money - often up to hundreds of multiples of your per spin stake for landing a high paying combination.

Jackpot slots also often award the top prize randomly. Of course, in a way all slots prizes are awarded randomly, with random number generator technology powering the reel outcomes on each spin. But with some progressive jackpot games, you can even find yourself being awarded the jackpot when you least expect it, and potentially even on a losing spin. Some of these games just pay the jackpot to a player at random at some point in the game, but unless you're spinning, you have no chance of winning.

In fact, Irish leprechauns and their pots of gold are probably amongst the most common backdrop to slots games, probably in light of classics like Rainbow Riches. Or maybe it's the near universal love people have for the Irish. Either way, it's a well served niche where it's often hard for new games to stand out. Not the case with Slots O' Gold however, the latest Irish offering from the developers at Blueprint Gaming.

The base game jackpot stands at a respectable 150, which is decent for a game of this type. The fast paced action is backed up with a strong RTP that puts 7 Monkeys firmly up there with the best of them – it stands at 96.00%, for a 4% house edge.

Progressive jackpots do tend to influence game RTP - the percentage of takings a game pays out to players in standard mode. This means the RTP of progressive or jackpot slots is invariably lower than it would be in a standard slots game. However, this is merely to take account of the size of the jackpot on the line, and these games are still often high paying, even in the base game, whether or not you scoop this top prize.
